SMART® Certified Trainer

Course Requirements

Program Overview

This program provides strategy, structure, and tools which helps enable you to train SMART solutions. You will complete the SMART Certified Trainer online pathway including prerequisites, submit a training video for evaluation and register with SMART.

Policies

1. Candidate must submit unique assignments; plagiarism will result in a FAIL
2. Candidate will have two opportunities to achieve a PASS on the video assignment
3. Once candidate has registered for this course, there are no refunds

Assignment

SMART Training Video: This assignment provides us with a view into your training room; we want to experience a moment in time during a training session. The course moderator will use the Video Methodology Rubric to assess your work (PASS/FAIL).

Goal: Using a stable (not hand-held) video recorder, SMART hardware and software record a 4 – 6 minute unedited video of yourself that captures your skills as a trainer which fulfills the requirements of the Video Methodology Rubric.

Directions:

1. Your unedited video will be 4 – 6 minutes in length and cover the following items:
    a. Personal introduction (15 seconds or less)
    b. Delivery sample of “Direct Instruction” portion of your training session including
        i. Lesson objectives (What do you set out to do?)
        ii. Overview of the lesson agenda
        iii. Discussion of a concept to be learned
        iv. Introduction and transition into “Modeling”, “Guided Practice”, or “Collaboration”
2. Use of the SMART solutions:
    a. Make use of the SMART solution
    b. Remember, even during introductions, we are teaching our technology through example (touch, move, reveal, writing, features and functions)
    c. Engage your camera audience (we want to see that you are comfortable)
    d. We want to see you in front of the SMART solution in the video
3. Be sure to model the elements within the Video Methodology Rubric
4. Avoid lecturing to the camera and/or editing your video
