

Health, Safety, Security and Environmental Policy

SMART Technologies is committed to providing a healthy, safe and secure work environment including reducing pollution and the environmental impact of our business. We will undertake all of our work in a safe, secure and environmentally responsible manner.

We all share in striving for a healthy, safe and secure workplace by integrating comprehensive Healthy, Safety, Security and Environmental (HSSE) programs into all aspects of our business and culture. We are committed to complying with all applicable HSSE legislation and other requirements to which SMART subscribes wherever we operate. We expect our people to be familiar and comply with all of SMART's HSSE policies, guidelines and procedures.

SMART will strive to continually improve performance through regularly setting and reviewing HSSE objectives and targets.
