

SMART Installation Training

SMART Board™ 600 & 600i

What to expect

- The session is led by a SMART Technical Trainer who has experience installing the SMART Board™ interactive whiteboard and Unifi™ 35 and 45 projectors in a variety of environments
- By the end of the session, you will be comfortable making informed decisions about installation options, connections and troubleshooting – all while working from a safety-first perspective
- You'll receive the *SMART Installation Training Manual*, the *Extending USB Connections Guide* and a USB drive full of useful installation and technical information
- Ample time will be provided for discussions, questions and answers that will help you relate what you've learned to your work
- All participants will have extensive opportunities for hands-on learning
- Real-time summative assessments will be conducted throughout the training day

Who should attend?

Anyone in your organization who installs, supports or supervises the installation of SMART Board interactive whiteboards

Extraordinary made simple™

SMART™

Event contents

1. **Safety first:** Learn what is required to complete safe installations. Topics include site surveys, tool and equipment requirements, and handling instructions.
2. **Extension options:** Learn about all the extension options SMART offers, including how to implement them. Topics include plenum space, cabling and USB specification and theory.
3. **Installing the interactive whiteboard:** Gain an in-depth understanding of how to install the SMART Board 600 series, the 600i for educators and the 600c for corporate users on various types of walls. You will also learn how to install various SMART accessories.
4. **Software and troubleshooting:** Learn the skills necessary to troubleshoot common hardware, connectivity and software issues

Customer requirements for on site sessions

- A room that comfortably holds 10 participants and a SMART Technical Trainer. It must have an area large enough to assemble and disassemble a SMART Board interactive whiteboard.
- A wall on which a SMART Board 600 series interactive whiteboard and Unifi projector can be installed
- A SMART Board 680 interactive whiteboard in its shipping box
- A floor stand (FS670)
- A Unifi projector in its shipping box
- An additional SMART Board interactive whiteboard (necessary for the SMART Technical Trainer to deliver the presentation)
- Access to the Internet

Participants must be willing to have their work frequently audited by SMART to maintain their factory trained installer designation.
