

# SMART Bridgit® conferencing software

**SMART**  
Collaborate Naturally™

Collaborate face-to-face with more people in more places with SMART Bridgit conferencing software. The latest version supports up to nine webcam video streams, making it easy to hold meetings that are visually engaging, dynamic and interactive. Meeting participants anywhere can work together as if they are in the same room.

## Chat function

Communicate with participants through integrated text messaging, without disturbing other participants.

## Intuitive toolbar

Access audio and video controls, participant lists and presentation tools.

## One-touch options

Access features and tools with a click of a button. You can invite participants, share your desktop and select the pen tool.

## Webcam support

View high-quality video streams from up to nine locations simultaneously.

The screenshot displays the SMART Bridgit conferencing interface. On the left, there are three video feeds of participants. In the center, a chat window titled 'All Users' is open. The main area shows a shared presentation slide titled 'Current market share \* Set goals!'. The slide features a 3D pie chart with segments for 5%, 15%, 10%, and 48% (with a red circle around 48% and '14% increase' written below it). To the right of the chart is a list of five items:

Rank	Name	Description
1	Allison Park	Done nulla aliquam ipsum eu tempus. Vestibulum et nulla nisi, ac tempus odio.
2	Cranberry	Facil conatillo, repere eu est curas liberandum. Ut liberis maus, Lorem ipsum dolor sit amet.
3	Butler	Perferendis magna enim, volutpat eget aliquam nec, praesent et aenean risu.
4	Glenshaw	Donec vestibulum luctus sapien ac ultrices. Nam gravida odio non mi nullus eget.
5	Etna	Facil nulla maus, diam quis hendrerit ac, liberis nullipar.

At the bottom of the slide, there is a 'Click to add notes' button. A purple icon of a person is visible in the bottom right corner of the interface.

## Write over shared desktops

Participants can share their desktops and write notes on shared content.

Encourage active participation	Rely on secure software
<ul style="list-style-type: none"> <li>✓ Everyone can fully participate in your remote meetings.</li> <li>✓ A shared collaboration space enables participants to see and write notes in digital ink.</li> <li>✓ Participants can share their desktops, and use integrated audio and instant messaging.</li> </ul>	<ul style="list-style-type: none"> <li>✓ Password protection and an encrypted media path ensure confidential information is protected.</li> <li>✓ Easily connects meeting rooms, local teams and remote participants.</li> <li>✓ Integrates with SMART Meeting Pro™ software and Microsoft Office.</li> </ul>

# Key Features

## Quick meeting start-up

Participants can join meetings through an automatically generated e-mail invitation or participate on an ad-hoc basis using the knock-to-join feature. And SMART Meeting Pro software's auto-join capability ensures your meeting begins on time.

## Fully interactive remote experience

Remote and local participants can experience the same level of interactivity by sharing video, webcams and screens. See up to nine video feeds simultaneously, and use multiple interactive displays in your collaboration sessions.

## Integration with Microsoft Outlook

Using Microsoft Outlook makes it easy to schedule meetings, which can be turned into collaborative sessions with a single click. Participants can use SMART Bridgit software in the meeting to access video and audio controls, participant lists, instant chat and other tools.

## Maximize meeting productivity

All participants can share desktops, and use SMART Ink to write annotations on important documents like drawings, spreadsheets and reports. Participants can take control of the desktop and add their ideas, and all notes can be saved for use later.

## Collaborate with iPad

Participants can collaborate in sessions using their iPads and a WiFi or cellular network to interact with the content being presented.

## Simplify administration

The software works with corporate firewalls, which reduces the need for IT support and simplifies administrative and security processes.

## Virtualization enhances cost efficiency

The software is easy to install on a virtualized server running vSphere 4.1, which reduces hardware costs and IT support.

## Maximize your technology investment

Extend the value of your investment in SMART interactive displays with SMART Bridgit software, which requires no additional conferencing solution. The software is integrated with all our SMART displays and Meeting Pro software, ensuring you are using the full power of SMART solutions.
