SMART Document Camera

The SMART Document Camera uses a high-resolution video camera to display clear and detailed images in real time.

Display digital images in real time

The SMART Document Camera can keep students interested in learning by helping you add spontaneity and interactivity to your classrooms, labs or lecture halls. Use it during a lesson to show real-time images to your entire class on a SMART Board™ interactive whiteboard. You can also capture images or video and instantly transform them into digital content for your course material.

Show clear, detailed close-ups

With a 5.2x optical and 8.0x digital zoom, the document camera delivers sharp, vivid images every time. Quickly direct learning by zooming in on the smallest detail or automatically focus images and adjust the brightness for varying light levels. And, the camera's LED lamp provides enough light for you to show images in a darkened room. You can even align the camera lens to a microscope eyepiece without needing an adapter.
Create interactive lesson content

The document camera comes with SMART Notebook software, which enables you to capture images and add them directly to a SMART Notebook page. The software has many creative features to help you easily turn captured images into interactive content for course material. You can operate the camera using control buttons built into the software.

Get started quickly in any location

It's easy for students and teachers to set up and use the SMART Document Camera. It conveniently connects to a computer, SMART Board interactive whiteboard or other display device. The document camera is also easy to share – carry it between learning spaces or move it anywhere in a room. It's lightweight, and you can use a Kensington® cable lock to ensure it's stored securely.

1 Zoom and automatic focus

2 Rotating head and arm

3 LED lamp

4 Camera lens

5 SD Memory Card slot

6 Removable presentation stage

7 Control panel

Key features

SMART Notebook software integration
Operate the camera through control buttons built into the software to capture images and add them directly to a SMART Notebook page. You can also write over static or moving images with live annotations.

Intuitive control panel
The camera's control buttons are clearly marked and easy to use. Quickly access them to adjust any setting.

Optical and digital zoom
Get sharp, detailed images with the camera's 5.2x optical and 8.0x digital zoom.

Removable presentation stage
The stage is separate from the document camera, so you can move it anywhere in the room.

Rotating head and arm
Rotate the head vertically 90 degrees and the arm horizontally 180 degrees to view an object from any angle.

Microscope mode
Quickly align the document camera's lens to a microscope eyepiece without needing an optical adapter.

SD Memory Card slot
Use an SD Memory Card (not included) to save your work even when the document camera is not connected to a computer.

Warranty
The SMART Document Camera comes with a five-year warranty.

Accessories (included)
AC adapter, anti-glare sheet (A5 size), RGB cable, user's guide, removable presentation stage, TWAIN driver, magnetic sheet, Image Mate software

SMART Notebook
SMART Notebook software sets the standard for creating, delivering and managing interactive course materials within a single application. It puts all your lecture materials at your fingertips.

With its rich set of features and digital resources, SMART Notebook helps educators deliver high-impact lectures and connects them to a full ecosystem of content, tools and support.

A powerful and easy-to-use application, SMART Notebook enables you to readily deliver interactive presentations that create more extraordinary learning moments for your students.
