

SMART GoWire™ auto-launch cable

With SMART GoWire auto-launch cable, you can

- Connect any laptop to your SMART Board interactive whiteboard or display and work with the laptop's files on a large interactive surface
- Access the features of SMART Meeting Pro software with any laptop, so you can write notes in digital ink and save them
- Give your clients and guests access to your SMART Board interactive whiteboards and displays without compromising your network security or requiring software installations

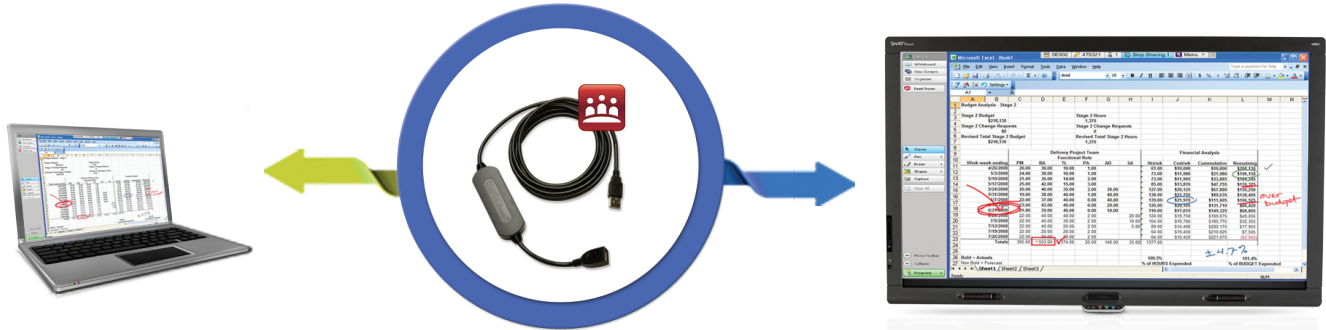

Add versatility to your collaborative workspaces with the SMART GoWire auto-launch cable. The SMART GoWire cable launches SMART Meeting Pro™ software when you use it to connect a laptop to your SMART Board™ interactive whiteboard or SMART Board interactive display, enabling you to work with the laptop's files on a large interactive surface. There's no need to install software on the laptop, and no software remains when you disconnect it. It's perfect for workspaces without network access, when you'd prefer not to install software or where there is frequent collaboration with guests and clients using their laptops.

SMART Meeting Pro on the go

To access SMART Meeting Pro with any laptop, simply use the SMART GoWire cable to connect the laptop to your SMART Board interactive whiteboard, SMART Board interactive display or SMART Podium™ interactive pen display. SMART Meeting Pro enables you to write in digital ink over standard office software applications. You can mark up files in common applications, such as Microsoft® Word, Excel®, PowerPoint®, Visio® and OneNote®, as well as Adobe® Acrobat® Pro, and SMART Meeting Pro will insert and save your notes in the original file. You can also write notes over virtually any application, capture them as a screenshot and save them in a PDF or PPT file. Or you can simply write whiteboard notes in digital ink and save them. Either way, you can distribute the marked-up files to your team instantly via e-mail, so everyone has the most recent notes when they get back to their computers.

More ways to work together

Compatible with SMART Board interactive whiteboards, displays and the SMART Podium interactive pen display, the SMART GoWire cable doesn't require a dedicated meeting room computer. Anyone can connect a laptop and have a collaboration session up and running in seconds. That means visiting team members, clients and other guests can take advantage of your SMART Board interactive whiteboards and displays without having to install software or access your network. It's just one more way SMART makes it easier for you to work together.

Key features

Included with SMART collaboration systems

The SMART GoWire auto-launch cable is included with both SMART collaboration systems – the SMART Board 885ix interactive whiteboard system and the SMART Board 8070i interactive display.

SMART Meeting Pro software

SMART Meeting Pro software is embedded in a USB drive inside the SMART GoWire cable. Write in digital ink over standard office software applications and save notes in a variety of ways. Write and save whiteboard notes in digital ink. Write notes over virtually any application, capture them as a screenshot and save them in a PDF or PPT file. Mark up files in common applications, such as Microsoft Word, Excel, PowerPoint, Visio and OneNote, as well as Adobe Acrobat Pro, and SMART Meeting Pro will insert and save your notes in the original file. Distribute the marked-up files to your team instantly via e-mail.

Easy to use

SMART Meeting Pro software's intuitive interface is easy to learn for first-time or occasional users.

Guest laptop support

The SMART GoWire cable enables you to connect any laptop to your SMART Board interactive whiteboard or interactive display. No dedicated meeting room computer or software installation is required. And because guests have no access to your network when they connect using the SMART GoWire cable, there's no security risk.

Auto launch

The SMART GoWire cable automatically launches SMART Meeting Pro software when connected to any guest laptop, and no software remains when the laptop is disconnected.

No installation required

The SMART GoWire cable eliminates the need to download and install software to connect a laptop to the SMART Board interactive whiteboard, SMART Board interactive display or SMART Podium interactive pen display.

SMART product integration

The SMART GoWire cable is compatible with all SMART Board interactive whiteboards, SMART Board interactive displays and SMART Podium interactive pen displays.
