SMART Notebook SE

(Student Edition) software

Today's students like to work in a flexible and visual digital environment. We designed SMART Notebook SE software to work the same way.

SMART Notebook SE (Student Edition) is collaborative learning software that helps students complete school work, take notes, manage due dates and organize digital material. And, with the portable bracelet version of SMART Notebook SE, students are able to use the software on any computer or mobile device, bringing their work with them everywhere they go.

SMART Notebook SE is available in both Mac and PC versions. It offers the same content and similar features as SMART Notebook collaborative learning software, which is widely used by teachers to create and deliver interactive lesson activities.

Makes learning more personal

With SMART Notebook SE, students can customize their home pages and keep track of their schedules and deadlines. Teachers are able to personalize learning by sharing their SMART Notebook-created lesson materials with students and by providing them with supplementary files that support their individual learning styles.

Lets student creativity shine

The software offers students the flexibility to express their creativity. Students can create their own multimedia material and use it to complete assignments and give presentations. Using the Tabs feature, they can access content creation tools and move simultaneously through multiple files. They can also take notes and write over digital lesson material.

Helps students organize with ease

SMART Notebook SE automatically saves files and stores them for easy access, helping students work more efficiently and stay organized. The Flags feature allows students to highlight important information with color codes so they can easily access material whenever they need it. Students can also quickly search for information by subject, keyword and due date, or by using keywords displayed in a Web 2.0 tag cloud.

Allows students to learn anywhere

The SMART Notebook SE software bracelet is ideal for students who don't have access to a dedicated computer at school. The software bracelet comes in both Mac and PC versions, and the software is preloaded on the bracelet so it runs automatically when students plug it into a computer. Students can complete their homework or assignments on any computer, and take the software and their files with them wherever they go.

1 My Binder – Students can keep everything organized

2 My Home – It's easy to give home pages a personal touch

3 Design templates – Ready-made templates help students prepare assignments

Key features

Personalize

- **My Home** – Allows students to personalize SMART Notebook SE software with their own photos, images and information. They can create their own home page from scratch or use a template.
- **Personal tutoring service** – Gives students 50 minutes of free tutoring time with Tutor.com, a homework and tutoring service that is accessible anytime

Create

- **SMART Notebook tools** – Offers students all the creative potential of award-winning SMART Notebook software, including drawing and writing tools, the ability to insert multimedia files into documents, the benefits of the page recording feature, and more
- **Design templates** – Enables students to save time by providing them with easily-customized, ready-made templates for homework and assignments
- **ScratchPad** – Allows students to quickly make notes anytime. A ScratchPad page is open and ready for use all the time. The pages are automatically stamped with a date so they can be easily located.
- **Tabs** – Helps students move content from one document to another in any order they choose. Students can use the tabs to quickly drag and drop objects into documents and add pages to files.

Organize

- **My Binder** – Allows students to organize schedules, assignments and to-do lists based on tags they assign to their SMART Notebook SE files
- **Tag cloud** – Helps students quickly locate files through keywords displayed in a Web 2.0 tag cloud. Common topics appear in a larger font, making them easier to find.
- **Flags** – Enables students to identify information in any file for reference later when they are studying for a test or preparing an assignment
- **Search function** – Offers students quick access to information by allowing them to search by keywords or phrases

Learn anywhere

- **SMART Notebook SE bracelet** – Allows students to take SMART Notebook SE and their files with them anywhere. The software is loaded onto a green or blue bracelet that contains 2 GB of storage capacity for files and multimedia content. The bracelet is available in both Mac and PC versions. All files are saved to the bracelet, ensuring no files are left behind after it is disconnected from the student's computer or mobile device.
- **Automatic file back up** – Provides scheduled back up of all data files on the software bracelet. Students can choose where the files are saved.

Content and resources

- **SMART Notebook Gallery** – Includes thousands of copyright-cleared images, backgrounds and multimedia files for use in developing reports, presentations and other materials. Students can also add their own images, and audio and video files.

System requirements

Windows operating system (XP only)
Pentium® II 450 MHz processor • 256 MB of RAM (512 MB recommended) • 200 MB of free hard disk space for minimum installation (860 MB for full installation with Gallery content) • Internet Explorer® Internet browser 6.0 or later • Adobe® Flash® player 8 or later

Requirements for SMART Video Player
Pentium II 450 MHz processor (700 MHz or faster recommended) • Windows® 2000 operating system or later • Microsoft® DirectX® application programming interface 8.1 or later

Mac operating system
1 GHz PowerPC G4 or G5 processors or Intel® processors (universal binary) • 512 MB of RAM • 250 MB of free hard disk space for minimum installation (1000 MB for full installation with Gallery Collections) • Mac OS X operating system software 10.5.4 • Safari application program 1.3.2 or later • Adobe Flash player v10 or later
