

## SMART Podium<sup>™</sup> interactive pen display

Control computer applications and write notes on the LCD screen while your students see the same image projected on a larger screen.

Deliver dynamic instruction and engage your students with the SMART Podium interactive pen display. Simply connect SMART Podium to a computer and projector to begin interacting with your lecture material on the pen display's LCD screen while it's simultaneously projected onto a large screen at the front of the room. Your students will see everything you do, as you do it.

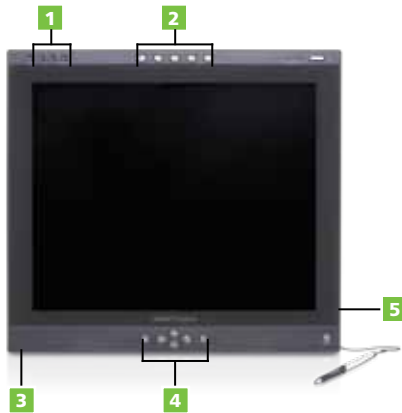

### Stand and deliver

To use SMART Podium, pick up the tethered, battery-free pen tool, and touch the screen to control applications and write notes in digital ink over your files, including SMART Notebook pages, PowerPoint® slides, websites and moving videos.

With SMART Podium, you can control the pace and flow of your lectures, making learning an active and dynamic process. The interactive pen display allows you to face your students as you teach – they will see your presentation as you interact with it, and you can maintain eye contact with them at the same time.

### Freedom to teach

SMART Podium keeps your lectures flexible and dynamic – you can bring up prepared material or write impromptu notes and draw diagrams in digital ink. You can also incorporate secondary learning materials right into your lecture. And when you're finished, you can save your notes into one convenient file to share with your students and colleagues.

- 1** On-screen buttons
- 2** Pen-tool buttons – left mouse button, digital ink color, eraser
- 3** USB port
- 4** Function buttons – On-Screen Keyboard, right mouse button, Screen Capture tool, Floating Tools toolbar, SMART Notebook software
- 5** USB ports

## Key features

### Interactive screen

Control your computer with the pen tool. Write over any application. The pen tool is the point of contact on the screen, so you don't have to worry if you brush the screen with your palm or sleeve. SMART Podium is designed with straight sides and a flat bezel so there is nothing to impede your natural writing flow.

### Save function

Capture your work in SMART Notebook™ collaborative learning software or save notes directly into several software applications, including AutoCAD® and Microsoft® PowerPoint, Word and Excel®.

### Battery-free tethered pen tool

Write smoothly and comfortably with the attached pen tool. Because it's battery free, there's no maintenance cost or downtime searching for replacement batteries.

### Pen-tool buttons

Change ink color or use the eraser without crowding your display with toolbars.

### Function buttons

Quickly access the right mouse button, On-Screen Keyboard, Screen Capture tool, Floating Tools toolbar and SMART Notebook.

### On-screen display buttons

Fine-tune display properties to suit your preferences.

### Adjustable tilt stand

Move the console to a comfortable angle for viewing content or writing notes.

### VESA mounting plate

Integrate the SMART Podium interactive pen display with any standard VESA mounting arm (75 mm for the ID350 and 100 mm for the ID370 and ID422w).

### USB connection

Easily connect SMART Podium to your computer.

### USB ports

Enhance your presentation by connecting a memory key, document camera or other peripheral to the two 2.0 high-speed ports.

### RGB video pass-through

Connect the interactive pen display to a digital projector so both devices display the same image.

### Warranty

Get a two-year limited warranty on the SMART Podium interactive pen display.
