

## SMART Board™ 8070i interactive display

### It's all about collaboration

Like all SMART business products, the 8070i is designed to enhance the way your teams work together. With its natural user interface and innovative features, it encourages collaboration, which can lead to increased effectiveness, efficiency and productivity for any business.

Experience precise touch performance in a sophisticated package with the SMART Board 8070i interactive display – a leading-edge collaboration system featuring a touch-enabled, high-definition 70" (177.8 cm) LCD flat-panel display, an unobtrusive control panel and a multiuser Pen Tray. Designed to complement high-end workspaces, it's fully integrated with SMART's DViT™ (Digital Vision Touch) technology and SMART Meeting Pro™ software, which enables writing in digital ink over the standard office applications you use every day.

### A revolution in collaborative technology

Not only does the 8070i deliver crisp, high-definition images, it makes interacting with your files an intuitive experience. You can write with a pen or your finger and erase with your fist. You can use the touch screen to open documents, launch applications and navigate the Internet. And because the 8070i supports Microsoft® Windows® 7 touch gestures, you can manipulate objects with gestures like zoom, rotate, pan, flick and toss. Two people can write, erase and manipulate objects simultaneously – the 8070i automatically recognizes what each user is doing and responds accordingly. With the 8070i, you have more options for generating ideas, capturing feedback and ensuring your team is working toward a common goal.

### A new level of collaboration and creativity

The 8070i fosters a working environment where teamwork can thrive. Its simple, elegant design invites use, and its powerful features inspire creativity. Whether you're in a scheduled meeting or an impromptu collaboration session, you can access files on your network or USB drive – or you can use the SMART GoWire™ auto-launch cable to connect a laptop and launch SMART Meeting Pro, with no installation required. Then you can mark up documents in Microsoft Office applications, like Word, Excel® and PowerPoint®, in digital ink and save and distribute them instantly via e-mail. Or you can save your whiteboard notes as PDF or PPT files that you can also send via e-mail. Either way, the entire team's feedback and ideas can be captured in real time, and everyone has the most recent version when they get back to their computers.

- 1 SMART Board 8070i interactive display – a multitouch, interactive, high-definition 70" (177.8 cm) LCD display that enables two users to simultaneously write, erase and manipulate content
- 2 Integrated control panel – includes volume control, input source switching and power button
- 3 USB and HDMI ports – connect laptops and other peripheral devices from easily accessible ports
- 4 Multiuser Pen Tray – the advanced Pen Tray automatically detects tool modes. The pens are integrated unobtrusively into the panel frame in a clean, simple design.

## Key features

### Commercial-grade, touch-enabled display

The 8070i is a 70" (177.8 cm) commercial-grade high-definition display powered by SMART's proprietary DVIT (Digital Vision Touch) technology, delivering a superior touch experience and bright, crisp 1080p images that make it easy to present and work with complex data.

### Elegant, sophisticated design

The professional design and crisp, eye-catching visuals of the 8070i make it perfect for any high-profile workspace.

### Multitouch interface

Two people can simultaneously write, perform mouse functions, erase and manipulate objects on the interactive whiteboard surface – and no special tools are required.

### Freestyle interaction

The 8070i enables two people to instantly start working together without having to switch into a separate multiuser mode or work in a confined area. And each user can individually complete actions, like writing in digital ink or moving objects with their fingers. It's perfect for freestyle collaboration and brainstorming.

## Touch gestures

Use simple, intuitive hand and finger gestures to work with content, including one- and two-finger navigational gestures, such as panning and flicking pages – and object gestures, like zoom, toss and rotate. The 8070i also supports Microsoft Windows 7 touch gestures.

## Object awareness

The 8070i uses DVIT technology to identify when you switch between your finger, a pen or an eraser. You can also write with a pen, erase with a palm and move objects with your finger, without having to press buttons, access on-screen menus or replace tools in the Pen Tray.

## SMART Ink™

Just pick up a pen and start writing. SMART Ink smoothes out your handwriting to improve legibility. You can write notes over any application and save them into Microsoft Office 2010 applications like Word, Excel, PowerPoint, Visio® and OneNote® as well as Adobe® Acrobat® Pro. You can also turn handwritten notes into text objects that you can manipulate.

## Dual-user pens

Pick up one of the pens or the eraser and the 8070i automatically detects which tool you've selected. Control buttons select the color and activate the On-Screen Keyboard, right-click and help functions.

## Warranty

Get a two-year standard warranty.

## Specifications

### SMART Board 8070i interactive display Size

66" W x 41" H x 8 1/2" D  
(168.5 x 103.7 x 33.6 cm)
