

## Connect students and their devices to a workspace with all your lesson content

SMART amp brings the whole class, groups of students or individuals together in a shared space to work on projects, add multimedia content and instant message. This is all done using student devices and while tracking contributions from each student, so educators have insight into who is contributing what.

The screenshot shows a digital workspace interface with a corkboard background. At the top, there are navigation tabs for "Workspaces" and "Today's Workspace". A toolbar on the left contains icons for adding users, images, text, and other content. The workspace itself is populated with several educational cards and documents pinned to the board. These include:

- The Rainforest:** A card with a green forest image and text describing rainforests as the world's largest living ecosystems, divided into four layers: Emergent, Canopy, Understory, and Forest Floor. It includes a URL: <http://images.nationalgeographic.com/wpf/media-live/photo...> and an "Open in new tab" button.
- Toucan:** A card with a toucan image and text stating they are members of the family Caprimulgidae and are found in the Neotropics. It also lists scientific names and classifications.
- Boa Constrictor:** A green card with an image of a snake.
- The Frog Life Cycle:** A card with a green frog image and the title "The Frog Life Cycle".
- Spider Monkey:** A purple card with an image of a monkey and text describing its habitat in Central and South America and its reproductive cycle.
- Sloth:** A yellow card with an image of a sloth and text describing its slow movement and habitat in the Amazon rainforest.
- Grow Frog:** A teal card with an image of a frog.

A large blue circular callout in the bottom right corner of the workspace contains the text: "Get a free 60-day trial smartamp.com".

Collaborate Naturally™

## Why choose SMART amp:

### Get more out of Google Apps for Education

SMART amp leverages Google Apps for Education to take co-creation and student-led learning to a whole new level.

### Real-time insight for teachers

Let students to work together, and with their teachers, across laptops and tablets in a workspace designed specifically for education.

### Make student devices more powerful

A simple interface means students interact with lessons, content and projects in natural, authentic ways – inside and outside the classroom.

### Seamlessly switch activities

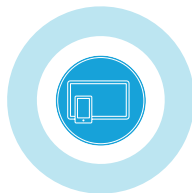

Move between whole class, individual and small-group learning activities, as well as project-based or flipped lesson activities, without wasting class time.

### Gauge individual contributions

Gain visibility into the learning process by easily seeing the contributions made by each student during group work in the collaborative workspace.

### Perfect for Chromebooks

SMART amp works beautifully on Chromebooks, and with it you can still view and write over your SMART Notebook® lessons.

## See all features at [smartamp.com](http://smartamp.com)

Students work together in the **collaborative workspace**.

Contribute to the workspace from **anywhere, at anytime**.

Provides the same experience on **tablets, laptops and interactive displays**.

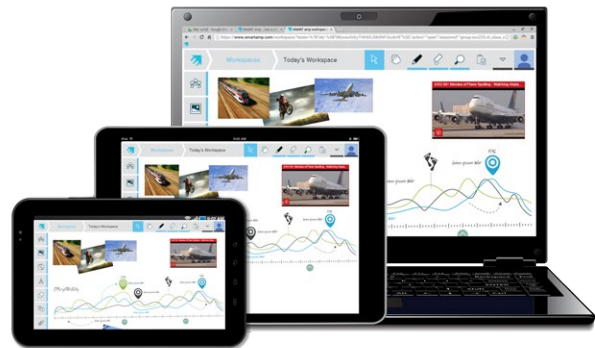

PART OF THE  
 SMART Learning Suite

SMART Notebook®

SMART lab™

SMART response® 2

SMART amp™

Take over the workspace at any time to **demonstrate and describe work to students**.

**Import SMART Notebook lessons**, view them in full screen, export pages and write over them.

Import your **Google Classroom class lists directly**. They update automatically.
