

# SMART Board® 6000 series interactive flat panels

A new era of classroom collaboration

## **Made for education**

Includes multi-touch and  
SMART Notebook® software

## **Built to last**

50,000 hours\* of  
uninterrupted lessons

## **Premium experience**

Pen ID™, Object awareness™  
4K Ultra HD

## A new level of dependability

Never worry about classroom downtime with 50,000 hours\* of stunning content quality and reliable service, outlasting typical technology lifecycles. Unlike consumer screens, we've designed our new generation of displays for the classroom. When it's time to replace, the timing is decided by you, when it's right for your school. No more downtime fixing burnt out projector bulbs, no shadows getting in the way, no glare or hot spots, and no faded images.

\*Brightness reduced by half

### Powered by SMART Notebook® software

Included is the software that teaches the world, optimized for use on SMART interactive displays. Create lesson plans in the same environment you'll be teaching on. The world's most popular learning software is made by teachers, for teachers, to inspire students in perfect harmony.

### Silktouch™ technology

The most accurate, natural, and responsive touch experience from corner-to-corner. Fingers glide effortlessly over the surface, providing hours of error-free use in perfect comfort.

### SMART ink™ technology

Writing is natural and looks better with SMART ink. Whether you're using a pen or finger, each stroke is a work of art. Its realistic digital ink improves legibility, so teachers don't have to re-write and students feel confident contributing.

### Pen ID™

Students can see their contributions free from interruption by their partner. Using different colored ink, you can write independently and simultaneously in any lesson activity to open new collaborative opportunities.

### Object awareness™

You already know how to use it. Offering the most intuitive experience by automatically differentiating between a finger, pen or palm, do what comes naturally. Touch, write, erase. Simplicity at its finest.

### 4K Ultra HD resolution

Durable commercial-grade, glare-free LED panels display brilliantly detailed 4K Ultra HD images and text (3840 x 2160 pixels). Crisp content clarity and readability keeps students involved no matter where they're seated in the room.

### Simultaneous touch points

With 4 simultaneous touch points, on Windows or Mac, multiple students can use gestures, like zoom, rotate and flip, at the same time. The natural learning experience develops essential life-long collaboration skills without students realizing it.
