Tomorrow's technology today

 SMART Learning Suite software included.

Built to last
50,000 hours of
uninterrupted lessons

Premium experience
Up to 10 simultaneous touch
points. HD or 4K Ultra HD
resolution available.

SMART

A new level of dependability

Never worry about classroom downtime with 50,000* hours of stunning content quality and reliable service, outlasting typical technology lifecycles. Unlike consumer screens, we've designed our new generation of displays for the classroom. When it's time to replace, the timing is decided by you, when it's right for your school. No more downtime fixing burnt out projector bulbs, no shadows getting in the way, no glare or hot spots, and no faded images.

*Brightness reduced by half

Key Features

Powered by SMART Learning Suite

SMART Learning Suite includes SMART Notebook®, SMART lab™, SMART response® 2 and SMART amp™. Together, they connect students, teachers and devices to turn lessons into enriching learning experiences.

Silktouch™ technology

The most accurate, natural, and responsive touch experience from corner-to-corner. Fingers glide effortlessly over the surface, providing hours of error-free use in perfect comfort.

SMART ink™ technology

Writing is natural and looks better with SMART ink. Whether you're using a pen or finger, each stroke is a work of art. Its realistic digital ink improves legibility, so teachers don't have to re-write and students feel confident contributing.

UHD & HD resolution

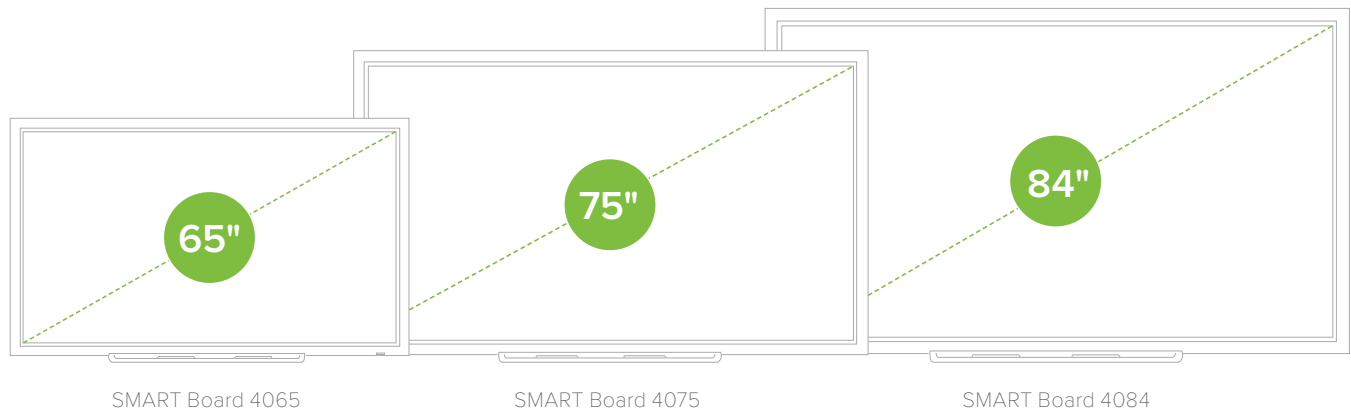

The durable, commercial-grade LED panels display brilliantly detailed images. All models are in 4K Ultra HD resolution, with the exception of the 65" model, which is 1080p HD. The antiglare surface keeps students involved no matter where they're seated in the room.

Simultaneous touch points

With up to 10 simultaneous touch points for Windows, multiple students can use gestures, like zoom, rotate and flip, at the same time. The natural learning experience develops essential life-long collaboration skills without students realizing it.

Mini PC compatibility

Connect your Mini PCs. The 4000 series contains mounting points, dedicated HDMI and USB ports and pass-through power for Mini PCs (75" and 84" only).
