

SMART Services

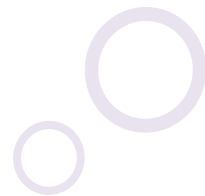

## SMART Usage Reporting for the **SMART Room System™ for Microsoft® Lync®**

Designed  
specifically for the  
**SMART Room  
System**

Access your unique usage data to maximize your ROI

Usage Reporting is a cloud-based service that provides analytics and data identifying when and how the system is being used, on an intuitive user dashboard. The installation is simple, the information is secure and reports are specific, allowing you to leverage your unique data to drive deployment decisions.

## Understanding your SMART Room System Usage

Manage your SMART Room System deployments by accessing powerful usage data, including:

- ✓ Where your system is being used
- ✓ How your system is being used
- ✓ Quality of experience your system provides

*\*All data refers to remote conferences and peer-to-peer meetings*

## Manage & Maintain

## The 3 steps in Usage Reporting

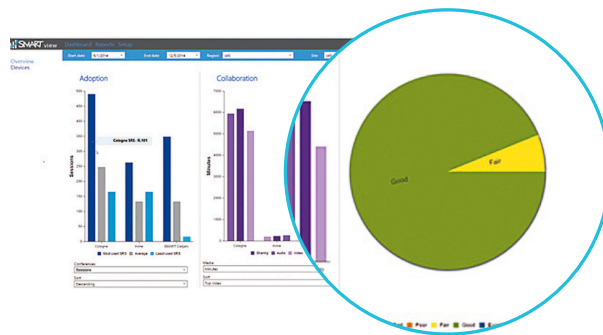

<b>1. Order</b>	Purchase subscription and create account
<b>2. Installation</b>	Download the aggregator in less than 3 minutes and assign your SMART devices
<b>3. Usage Reports</b>	Log into SMART View portal to see all dashboards and usage reports

## “Open Kitchen” approach to Usage Reporting

Usage Reporting for the SMART Room System is transparent and secure. The data is visible to the user and all personal information is sanitized at the source, providing assurance on data privacy.

### The benefits of Usage Reporting

- Provides SMART Room System usage data
- Reduces operational costs of quality audits and reporting projects
- Manages deployments more effectively
- Increases user adoption and identifies training gaps
