Drive natural collaboration across your hyper-connected world

ARE YOU COLLABORATING *or* JUST COMMUNICATING?

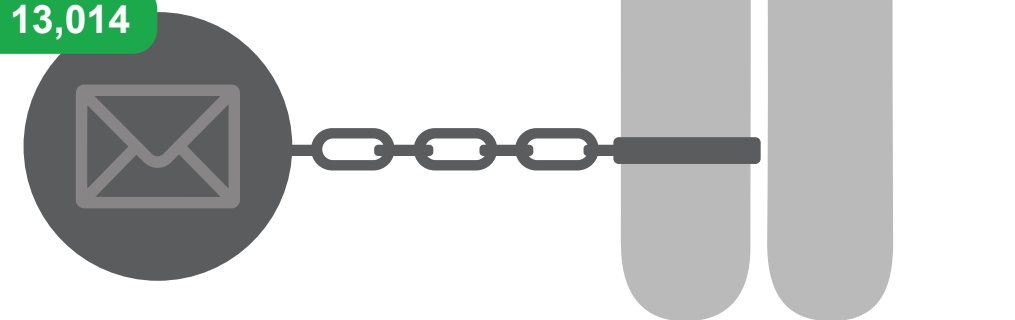

Collaborating is about working together in real time to get things done. That's why email is fine for communicating, but not for the give-and-take of live collaboration.

CLOUD-CONNECTED BUT STILL EMAIL-CONSTRAINED.

- Professionals today receive **300+** business emails per week
- Requiring hours of sorting, organizing, writing, and replying
- It's time to stop forcing email to be something it's not

THE INEFFICIENCY IS SPREADING.

- Enjoy less inbox clutter and more time to get things done

AND SAY “HELLO” TO REAL-TIME WHITEBOARDING.

- Seamlessly connect remote participants via their mobile devices
- Capture, save, and share live content, anytime and anywhere
