Standard Features

|	
Software	Actalyst™ interactive overlay touch driver software. Upgrades are available at smarttech.com/software.
Controller	You can mount the controller on the back of the interactive overlay with two included thumbscrews. A modular cable connects the interactive overlay to the controller, and the controller connects to a computer with the included 21' 6" (6.5 m) USB/serial converter cable. The DB9 serial connector connects to the controller and the USB connector connects to an available USB receptacle on the computer.
Mounting Brackets	Four mounting brackets secure the interactive overlay to the plasma display with eight No. 8-32 thumbscrews.
Front Surface Material	Hard-coated, anti-glare polyester that's designed for optimal light transmission. Chemical and scratch resistant.
Digitizing Technology	DViT™ (Digital Vision Touch) technology uses two digital cameras in the top two corners of the interactive overlay to track an object interacting with the display surface.
Power Requirements	Switching power supply, 100V–250V AC, 47Hz–63 Hz, 12V DC 4.2A, 6' (1.8 m) power cord
Power Consumption	Power consumption is up to 40 W.
Compliance	CE, WEEE, RoHS (Europe), RoHS (China)
Warranty	Two-year limited equipment warranty
Installation Notes	You can install the interactive overlay on a plasma display that is securely mounted to a wall or floor stand. However, the wall mount or floor stand must be able to support a combined weight of 120 lb. (54.4 kg). Because of stability and mechanical fit issues, table stands are not recommended. You cannot attach speakers directly to the sides of a plasma display when an interactive overlay is installed. Do not install the Actalyst interactive overlay where it will be exposed to the weather or direct sunlight.
