

Frequently asked questions

SMART kapp iQ

You can use the SMART kapp iQ™ board to collaborate with others in a simple but powerful way. This document answers a number of frequently asked questions about the SMART kapp iQ board.

NOTE

For more information about the board, see the *SMART kapp iQ board user's guide* (smarttech.com/kb/170812).

General

Where can I find purchasing information for the board?

Visit smartkapp.com/store for complete information on price, availability and where to buy a board.

Where can I find more information about the board?

Visit smartkapp.com/support to find additional information such as product specifications, install guides and user's guides.

Is the board mobile? Can I move it?

You can install a SMART kapp iQ board in most environments and make it mobile by mounting it on a SMART Mobile Stand (smarttech.com/kb/131862). This enables you to move the board more easily.

What type of mounting plate should I use to mount my board to a wall?

You can use either a standard VESA 400 mm x 400 mm mounting plate or a SMART wall stand kit (WSK-SINGLE) to install your board on a wall. All wall mounts are sold separately. For more information on installing your board, see the SMART kapp iQ user's guide (smarttech.com/kb/170812). For more details and purchasing information for the SMART wall stand kit, see the specifications (smarttech.com/kb/170526).

GENERAL

How many pens are included with the board, and can I buy replacement pens?

The SMART kapp iQ board comes with a black pen and a red pen. You can purchase replacement pens from the Store for SMART Parts (see smarttech.com/Support/PartsStore).

SMART kapp app

Which mobile devices and operating systems are compatible with the app?

You can use the SMART kapp app on the following devices and operating systems:

Device type	Requirements
Apple	<ul style="list-style-type: none">• iOS 8.1 or later operating system software• 50 MB of storage• iPhone 4S or later• Third generation iPad or later• First generation iPad mini or later• Fifth generation iPod touch or later
Android	<ul style="list-style-type: none">• Android 4.4.4 (KitKat) or later operating system• 50 MB of storage (internal or SD card)• 1024 MB of RAM• 720p or better screen resolution• Bluetooth 2.1+ EDR• 3 megapixel or better rear-facing camera (recommended)

What languages does the SMART kapp app support?

Currently, the SMART kapp app supports the following languages:

- English
- German
- French
- Spanish
- Chinese

In what file formats can I save snapshots?

The SMART kapp app can save snapshots as JPEG or PDF files.

What is the typical file size of a snapshot?

Snapshots are small files, typically less than 30 KB.

How many users can join a session?

Up to 250 users can join a shared session.

Connecting

Does the board require an Internet connection?

The board doesn't require access to the Internet (wired or wireless). The mobile device that connects to the board requires Wi-Fi® or a mobile data plan to share a board session and to share snapshots to the Evernote® service or other cloud services.

How do I connect my mobile device to the board?

It's easy to connect your mobile device to the board. Simply scan the board's QR code (iOS or Android™ mobile devices) or tap the NFC tag (Android mobile devices only) to initiate a Bluetooth® connection.

NOTE

Currently, you are unable to connect the board to an iPhone 6 using the mobile device's NFC support.

Can I connect a computer to the board?

The board connects directly to the SMART kapp app through Bluetooth using an iOS or Android mobile device. After you capture snapshots on a mobile device or on a USB drive, you can transfer the snapshots to a computer.

Can I connect multiple boards together?

If another user is viewing your session in the SMART kapp app on a mobile device, he or she can connect to another SMART kapp iQ board and view and interact with the session on the board.

Can other users write and erase notes in my session?

When you share a SMART kapp iQ board session with other users, the other users can write and erase notes in your session from the SMART kapp app, the SMART kapp browser-based viewer or, as noted above, from another SMART kapp iQ board.

Security

The board saves data to a cloud-based service. Isn't the cloud a scary place where people can steal data?

SMART helps protect your sensitive information in the kappboard.com cloud service by using only encrypted communication protocols (HTTPS) and removes it as soon as you stop sharing. These measures are in addition to industry-standard security best practices.

What prevents someone from intercepting content from a board?

When a user connects to a board, a connection icon indicates that a device is connected. Only one mobile device can connect to a board at a time. The board uses only encrypted protocols to communicate over Bluetooth (in addition to what Bluetooth itself provides), effectively reducing the risk of data interception in the air.

After I erase ink on the board, can someone connect a mobile device and see information I've already erased?

When you erase ink on the board's surface, the ink is permanently removed from the board's memory. Only the remaining ink that's visible on the board is synchronized with connected mobile devices.

NOTE

For more details about SMART kapp's security features, see onlinehelp.smarttech.com/kappsecurity.
