Use this list to find the correct SMART Board® interactive overlay for your flat-panel display and the number of spacers required during installation.

COMPATIBILITY GUIDE

SMART Board 400 series interactive overlay flat-panel display fit list

Finding a compatible interactive overlay for your flat-panel display

SMART Board 400 series interactive overlays fit a range of commercial grade LCD or plasma landscape-format flat-panel displays with a range of bezel sizes.

IMPORTANT

- The interactive overlay is not compatible with portrait-format or LED flat-panel displays.
- The interactive overlay is not recommended for use in a horizontal table-top orientation with the interactive area pointing up.
- The interactive overlay bezel obstructs the flat-panel infrared receivers for some flat-panel models. Please see the appropriate specification sheet for more exact physical dimensions.
- This document is a guideline for approximate fit. Check the fit of the interactive overlay on the flat-panel display to ensure compatibility.

To find the interactive overlay model compatible with your flat-panel display

1. Find the screen size, manufacturer and model of your flat-panel display.
2. Refer to the tables in this document to find the compatible interactive overlay model and the number of spacers required for installation.

NOTE

If your flat-panel display isn't listed in these tables, contact SMART Support by visiting smarttech.com/contactsupport.
