SMART Board® 6065-V2 interactive flat panel with iQ
Model SPNL-6265-V2

Overview

The SMART Board® 6065-V2 interactive flat panel with iQ is the hub of your classroom. iQ technology connects devices, lesson content and pedagogically relevant software to create a cohesive educational experience. PC-free embedded computing provides one-touch access to a diverse suite of SMART applications—Notebook lessons, workspaces, gamification activities and whiteboard—and collaborative tools, such as wireless screen sharing and a web browser. There’s no need for wires, cables or manual software and firmware updates.

The 65” 4K ultra-high-definition LED display provides optimal image clarity and wide viewing angles. With the Pen ID™ feature, you can assign different appearances to the two pens and write or draw over any application in digital ink.

Object awareness™ allows you to perform mouse functions with your finger, write in digital ink with the pen, and erase with your palm or eraser—all without switching tools or modes. You can use a variety of gestures in applications, and two users can write or draw at the same time.

### Cable requirements

| HDMI | Maximum length: 23’ (7 m) |

### NOTES

- Use only certified HDMI cables that have been tested to support the performance standard you require.
- The performance of cables longer than 23’ (7 m) is highly dependent on the cable’s quality.
## DisplayPort
DisplayPort 1.2 compliant or better  
Maximum length: 23’ (7 m)

## USB
Maximum length: 16’ (5 m)

## Important
Using cables that exceed these maximum lengths can produce unexpected results, such as degraded picture quality or USB connectivity. Refer to [SMART installation standards](smarttech.com/kb/171035) for comprehensive information about cables and extensions for SMART hardware products.
