SMART Board® 7075R interactive display
Model SBID-7075R

Overview

The SMART Board® 7075R interactive display with SMART Learning Suite helps you engage students and achieve better outcomes.

The 4K ultra-high-definition LED display provides optimal image clarity and wide viewing angles. The display's HyPr Touch™ with EMR technology provides industry-leading touch and digital ink performance. You can interact with applications through touch, write or draw over any application with the four pens, and erase with your palm or the two erasers—all without switching tools or modes. With the new True Palm Rejection feature, you can even rest your palm on the screen while writing or drawing. The Pen ID™ feature allows you to assign different appearances to the pens, and multiple users can write or draw at the same time.

### SPECIFICATIONS

**SMART BOARD 7075R INTERACTIVE DISPLAY – MODEL SBID-7075R**

| USB 2.0 | USB 2.0 certified  
|         | Hi-Speed (480 Mbps) support  
|         | Maximum length: 16’ (5 m) |
| USB 3.0 | USB 3.0 certified  
|         | SuperSpeed (5 Gbps) support  
|         | Maximum length: 9’ (3 m) |

**NOTES**

- SMART supports only installations that use directly connected video and USB cables, AC-powered extenders, or USB extenders purchased from SMART.
- You might be able to use higher-grade cables that are longer than specified. If you have problems with such a cable or an extender of any type, test the connection with a shorter cable before contacting SMART Support.

**USB Type-C**

| USB Type-C | USB 3.1 certified  
|            | SuperSpeed (5 Gbps) support  
|            | Maximum length: 6’ (2 m) |

**NOTES**

- To use a USB Type-C cable for video, you need:
  - A cable that supports USB 3.1 (Gen 1 or Gen 2)
  - A computer that supports Display Port Alternate Mode
- Passive USB Type-C cables are sufficient for 60 W charging.
- You might be able to use higher-grade cables that are longer than specified. If you have problems with such a cable or an extender of any type, test the connection with a shorter cable before contacting SMART Support.

**Important**

Using cables that exceed these maximum lengths can produce unexpected results, such as degraded picture quality or USB connectivity. Refer to Installation best practices for SMART products ([smarttech.com/kb/171035](https://smarttech.com/kb/171035)) for comprehensive information about cables and extensions for SMART hardware products.
