Specifications
SMART Board® 7075R Pro interactive display with iQ
Model SBID-7275R-P

Overview
The SMART Board® 7075R Pro interactive display with iQ, SMART TeamWorks™, and SMART Meeting Pro® software is the hub of your meeting room.

The 4K ultra-high-definition LED display provides optimal image clarity and wide viewing angles. The display's HyPr Touch™ with EMR technology provides industry-leading touch and digital ink performance. You can interact with applications through touch, write or draw over any application with the four pens, and erase with your palm or the two erasers—all without switching tools or modes. With the new True Palm Rejection feature, you can even rest your palm on the screen while writing or drawing. The Pen ID™ feature allows you to assign different appearances to the pens, and multiple users can write or draw at the same time.

The display’s embedded iQ experience provides one-touch access to collaborative tools, including a whiteboard, wireless screen sharing, and a web browser. With minimal network integration, there’s no need for wires, cables, PCs, appliances, or manual software and firmware updates.

### Installation requirements

**Interactive display**

See the SMART Board 7000R and 7000R Pro series interactive displays installation and maintenance guide (smarttech.com/kb/171538)

**IMPORTANT**

The display needs an internet connection for downloading and installing important updates. Ask the network administrator to configure the network correctly for the iQ experience. For more information about network configuration, see Connecting a SMART display with the iQ experience to a network.

### Room computers and guest laptops

**General requirements**

See SMART TeamWorks software release notes or SMART Meeting Pro software release notes

**4K UHD**

Video card that can support 3840 × 2160 resolution at 60 Hz

See Minimum requirements for Ultra High Definition or 4K on your interactive flat panel

### Mini-computers

**General requirements**

See SMART TeamWorks software release notes or SMART Meeting Pro software release notes

**Dimensions**

Smaller than 10" × 10" × 2" (25.4 cm × 25.4 cm × 5.1 cm)

**Weight**

Less than 10 lb. (4.5 kg)

**Mounting**

VESA 75 mm × 75 mm or 100 mm × 100 mm mounting pattern

### Cable requirements

**HDMI**

Maximum length: 23’ (7 m)

**NOTES**

- Use only certified HDMI cables that have been tested to support the performance standard you require.
- The performance of cables longer than 23’ (7 m) is highly dependent on the cable’s quality.

**USB 2.0**

USB 2.0 certified

Hi-Speed (480 Mbps) support

Maximum length: 16’ (5 m)
## USB 3.0

**USB 3.0**

USB 3.0 certified  
SuperSpeed (5 Gbps) support  
Maximum length: 9' (3 m)

### NOTES
- SMART supports only installations that use directly connected video and USB cables, AC-powered extenders, or USB extenders purchased from SMART.
- You might be able to use higher-grade cables that are longer than specified. If you have problems with such a cable or an extender of any type, test the connection with a shorter cable before contacting SMART Support.

## USB Type-C

**USB Type-C**

USB 3.1 certified  
SuperSpeed (5 Gbps) support  
Maximum length: 6' (2 m)

### NOTES
- To use a USB Type-C cable for video, you need:
  - A cable that supports USB 3.1 (Gen 1 or Gen 2)
  - A computer that supports Display Port Alternate Mode
- Passive USB Type-C cables are sufficient for 60 W charging.
- You might be able to use higher-grade cables that are longer than specified. If you have problems with such a cable or an extender of any type, test the connection with a shorter cable before contacting SMART Support.

### Important

Using cables that exceed these maximum lengths can produce unexpected results, such as degraded picture quality or USB connectivity. Refer to *Installation best practices for SMART products* (smarttech.com/kb/171035) for comprehensive information about cables and extensions for SMART hardware products.

## Storage and operating requirements

### Power requirements

- 100V to 240V AC, 50 Hz to 60 Hz
