Overview

The SMART Board® 7075 display with iQ and SMART Learning Suite is the hub of your classroom. iQ technology connects devices, lesson content, and educational software to create a teaching and learning experience. PC-free embedded computing provides one-touch access to collaborative tools, such as wireless screen sharing and a web browser, and a diverse suite of SMART applications—Notebook lessons, workspaces, gamification activities, and whiteboard. With minimal network integration, there’s no need for wires, cables, or manual software and firmware updates.

The 75" 4K ultra-high-definition LED display provides optimal image clarity and wide viewing angles. With the Pen ID™ feature, you can assign different appearances to the four pens and write or draw over any application in digital ink.

Object Awareness™ allows you to perform mouse functions with your finger, write in digital ink with the pen, and erase with your palm or eraser—all without switching tools or modes. You can use a variety of gestures in applications, and four users can write or draw at the same time.

See education.smarttech.com for more information.

As an ENERGY STAR® certified signage display, the SMART Board 7075 interactive display meets strict energy efficiency guidelines set by the U.S. Environmental Protection Agency and Department of Energy.

Cable requirements

HDMI
Maximum length: 23'(7 m)

**NOTES**
- Use only certified HDMI cables that have been tested to support the performance standard you require.
- The performance of cables longer than 23' (7 m) is highly dependent on the cable's quality.

Hi-Speed (480 Mbps) support
Maximum length: 16' (5 m)

USB 3.0
USB 3.0 certified
SuperSpeed (5 Gbps) support
Maximum length: 9' (3 m)

**NOTES**
- SMART supports only installations that use a 9' (3 m) direct connection or a 16' (5 m) connection that includes an AC-powered active USB extender.
- You might be able to use higher-grade cables that are longer than 9' (3 m). If you have problems with such a cable or an extender of any type, test the connection with a 9' (3 m) or shorter cable before contacting SMART Support.
Important  Using cables that exceed these maximum lengths can produce unexpected results, such as degraded picture quality or USB connectivity. Refer to Installation best practices for SMART products (smarttech.com/kb/171035) for comprehensive information about cables and extensions for SMART hardware products.
