SMART Board® 7075 interactive display with iQ and Intel® Compute Card
Model SBID-7375

Overview

The SMART Board® 7075 interactive display with iQ and Intel® Compute Card is the hub of your classroom. iQ technology connects devices, lesson content and pedagogically relevant software to create a cohesive educational experience. PC-free embedded computing provides one-touch access to a diverse suite of SMART applications—Notebook lessons, workspaces, gamification activities and whiteboard—and collaborative tools, such as wireless screen sharing and a web browser. With minimal network integration, there's no need for wires, cables or manual software and firmware updates.

Install an Intel Compute Card in the appliance to provide a complete Windows® 10 solution at your fingertips. Choose from three compute card options to provide a consistent room-to-room Windows Full HD experience.

The 75" 4K ultra-high-definition LED display provides optimal image clarity and wide viewing angles. With the Pen ID™ feature, you can assign different appearances to the four pens and write or draw over any application in digital ink.

Object Awareness™ allows you to perform mouse functions with your finger, write in digital ink with the pen, and erase with your palm or eraser—all without switching tools or modes. You can use a variety of gestures in applications, and four users can write or draw at the same time.

See education.smarttech.com for more information.

As an ENERGY STAR® certified signage display, the SMART Board 7075 interactive display meets strict energy efficiency guidelines set by the U.S. Environmental Protection Agency and Department of Energy.

### Hardware

#### Interaction

- **Touch technology**: HyPr Touch™ (Hybrid Precision Touch) proprietary hybrid system, which greatly improves upon its InGlass™ core by optimizing both touch and pen performance, resulting in virtually no lag and zero contact detect height.

- **Multitouch capabilities**: Up to 16 simultaneous interaction points (combination of 10 finger touch points, four pen touch points and two eraser touch points)²

- **Object Awareness**: Behavior adjusts automatically to the tool or object you’re using, whether it’s a pen, finger, eraser, or palm.

- **Pen ID**: Four people can write independently and simultaneously, using different colored ink.

#### Display

- **Type**: LED
- **Aspect ratio**: 16:9
- **Optimal resolution ("HDMI 1" input)**: 4K UHD (3840 × 2160) at 60 Hz
- **Horizontal frequency (typical)**: 135 kHz
- **Vertical frequency (typical)**: 60 Hz

---

¹All dimensions ± 1/8" (0.3 cm). All weights ± 2 lb. (0.9 kg).

²Only up to 10 touch points and no pen or eraser support on Chrome OS™ operating system.

**NOTES**
- Use only certified HDMI cables that have been tested to support the performance standard you require.
- The performance of cables longer than 23' (7 m) is highly dependent on the cable’s quality.

#### Important

Using cables that exceed these maximum lengths can produce unexpected results, such as degraded picture quality or USB connectivity. Refer to *Installation best practices for SMART products* (smarttech.com/kb/171035) for comprehensive information about cables and extensions for SMART hardware products.
