SMART Board® 7075 Pro interactive display with iQ and Intel® Compute Card
Model SBID-7375P

Overview
The SMART Board® 7075 Pro interactive display with iQ and Intel® Compute Card is the hub of your meeting room. PC-free embedded computing provides one-touch access to collaborative tools, including a whiteboard, wireless screen sharing and a web browser. With minimal network integration, there’s no need for wires, cables or manual software and firmware updates.

Install an Intel Compute Card in the appliance to provide a complete Windows® 10 solution at your fingertips. Choose from three compute card options to provide a consistent room-to-room Windows Full HD experience.

The 75" 4K ultra-high-definition LED display provides optimal image clarity and wide viewing angles. With the Pen ID™ feature, you can assign different appearances to the four pens and write or draw over any application in digital ink.

Object Awareness™ allows you to perform mouse functions with your finger, write in digital ink with the pen, and erase with your palm or eraser—all without switching tools or modes. You can use a variety of gestures in applications, and four users can write or draw at the same time.

See smarttech.com for more information.

As an ENERGY STAR® certified signage display, the SMART Board 7075 Pro interactive display meets strict energy efficiency guidelines set by the U.S. Environmental Protection Agency and Department of Energy.
