# SMART Board™ Interactive Whiteboard Systems

## Models SB600i2, SB600i3 and SB685ix

A SMART Board™ interactive whiteboard system comprises an interactive whiteboard, a wall-mounted short-throw projector and a centralized control of all classroom technology. SMART Technologies has evolved its interactive whiteboard system from the SB600i to the SB600i2, both with a Unifi™ projector, to the SB600i3 with the SMART UF55 projector and now the SB685ix with the UX60 projector. The SMART Board 685ix interactive whiteboard system features the best projected wide screen image available, networking capabilities and a unique ultra-short-throw distance through a mechanical adjustment module that protects you and your technology investment against potential damage.

Feature	600i2 Series (Unifi 45 projector)	600i3 Series (SMART UF55 and SMART UF55w projector)	685ix Series (UX60 projector)
Compatibility with SMART Board Interactive Whiteboard Models	Available for two interactive whiteboard models: <ul style="list-style-type: none"><li>• SB660 and SB680 with the Unifi 45 projector</li></ul>	Available for six interactive whiteboard models: <ul style="list-style-type: none"><li>• SB660, SBD660, SB680 and SBD680 with the SMART UF55 projector</li><li>• SB685 and SBD685 with the SMART UF55w projector</li></ul>	Available for two interactive whiteboard models: <ul style="list-style-type: none"><li>• SB685 and SBD685 with the UX60 projector</li></ul>

Network Management	Not available	You can connect the SMART UF55/UF55w projectors to an IP network to receive and send commands through its Web server and SNMP client, and to send e-mail alerts. You can remotely control, manage and diagnose the projector.	You can connect the UX60 projector to an IP network to receive and send commands through its Web server and SNMP client, and to send e-mail alerts. You can remotely control, manage and diagnose the projector.
Projector System Installation and Image Adjustment	The mounting boom includes five mechanical adjustments for aligning the projector image.	The simple boom design and swivel projector mount make projector alignment easy. The mounting boom includes three mechanical adjustments for aligning the projector image. You can configure the multi-position boom to work with your interactive whiteboards.	The ultra-short-throw UX60 projector uses attached adjustment modules instead of a boom, and includes five mechanical adjustments for aligning and adjusting the projector image, with more control than the Unifi 45 and with more precision than the SMART UF55.
