

Release notes

SMART Meeting Pro™ 3.0 software

About these release notes

These release notes summarize the changes in SMART Meeting Pro™ 3.0 software and its service packs.

Product information

SMART Meeting Pro software is a collaboration and meeting productivity software that integrates an easy-to-use interactive whiteboard application, SMART Product Drivers, an enhanced SMART Bridgit® software conferencing client, Microsoft® Exchange integration and multiple display management and SMART Ink™. When you install SMART Meeting Pro software on a room resource computer connected to a SMART product, such as a SMART Board® interactive whiteboard or a SMART Board interactive flat panel display, you have touch control automatically and can begin to use this SMART business solution.

To take advantage of SMART Meeting Pro software room-to-room meetings, and to include local and remote participants in your meeting, you must install and configure a SMART Bridgit server.

SMART Meeting Pro 3.0 software summary

About this release

This release introduces new features to SMART Meeting Pro software including Microsoft Exchange integration, the Business Gallery, the ability to write with SMART Ink, and enhanced SMART Bridgit software functionality. Also, SMART Meeting Pro software now offers the full complement of features previously available only with SMART Meeting Pro Premium software including View Screens mode, SMART Bridgit software integration, Object menu arrow options, the Programs button and multiple display support.

RELEASE NOTES

- Discrete 256 MB VRAM and support for Microsoft DirectX 9 technology
- 1 GB of free hard disk space for minimum installation (additional free space required during installation)
- 10 Mbps network connection (100 Mbps recommended) supporting TCP/IP

i NOTE

Operating systems and other third-party software released after this SMART software may not be supported.

New features

- SMART Meeting Pro 3.0 software combines integration with both Microsoft Exchange and SMART Bridgit software, enabling you to automate your conferencing and conduct effective meetings. Use your Outlook® calendar to schedule and send meeting invitations, and then access the meeting details from SMART Meeting Pro software. Use SMART Bridgit software to enable remote participants to join your meeting.

i NOTE

To use these features you must have Microsoft Exchange Server and a SMART Bridgit server. Please see your system administrator to confirm availability.

- When Microsoft Exchange integration is enabled, you can join meeting rooms to your SMART Bridgit meeting automatically.
- As your meeting progresses, the *Meeting Notification* window presents you with status messages to indicate how much time you have left in your meeting. You also receive a five-minute reminder when your scheduled meeting time is about to end.
- When SMART Bridgit software integration is enabled, you can use the new *Knock to join* meeting feature of SMART Bridgit 4.5 software.

RELEASE NOTES

SMART Meeting Pro 3.0 software

- You can use SMART Ink to write and draw in digital ink over open applications, videos, files, folders, websites and any other open window on your computer. You can use SMART Ink Notes to write over your desktop or use the SMART Ink Document Viewer to write over PDF files. When you open an application that has its own ink tools, you can turn off SMART Ink and use the application's ink tools to write directly in the application's content.
- The Business Gallery is a collection of templates and images you can use to improve your meeting experience while using SMART Meeting Pro software. You can also create your own content in the Whiteboard drawing area and then save it to the Business Gallery for future use.
- You can use the new Tutorials section in the SMART Meeting Pro software online Help to make the most of SMART Ink and SMART Meeting Pro software.

Known issues

- If you install or remove SMART Ink, you might need to select your default PDF viewer the next time you open a PDF file.
- You must install Microsoft Visual Studio® Tools for Office (VSTO) to use SMART Ink. If VSTO isn't installed, a message appears prompting you to install it. This message could appear in English when you're using SMART Ink in other languages.
