

Professional Learning for teachers and administrators

SMART Notebook® collaborative learning software

Overview

SMART Notebook collaborative learning software is an educational tool that delivers inspiring lessons, provides access to high-quality education content, and engages students in the classroom. The SMART Notebook software supports a variety of pedagogical styles, subjects and age groups, is easy to use and intuitive and allows lessons to be delivered effortlessly.

SMART provides valuable training, professional development and support resources, helping you use SMART hardware and software to its full potential.

There are multiple self-paced online courses and bundles available. By enrolling, you'll develop pedagogical and product-usage skills and your achievements will be globally recognized.

These courses cover topics on a variety of products, including frameworks for guidance and adoption, feature walk-throughs and opportunities to update select past certifications.

Find courses and other resources to ensure you have the skills and confidence to use SMART solutions effectively in the classroom.

See smarttech.com for more information on this product.
