

# Be SMART training and professional development's Valentine

Fall in love with learning all over again this month.

For SMART training and professional development, Valentine's Day wouldn't be complete without sending a little love out to teachers.

We're playing matchmaker this year, and pairing you up with some of our favorite courses. Explore discounted professional development opportunities and extend your knowledge of classroom technology all month long.

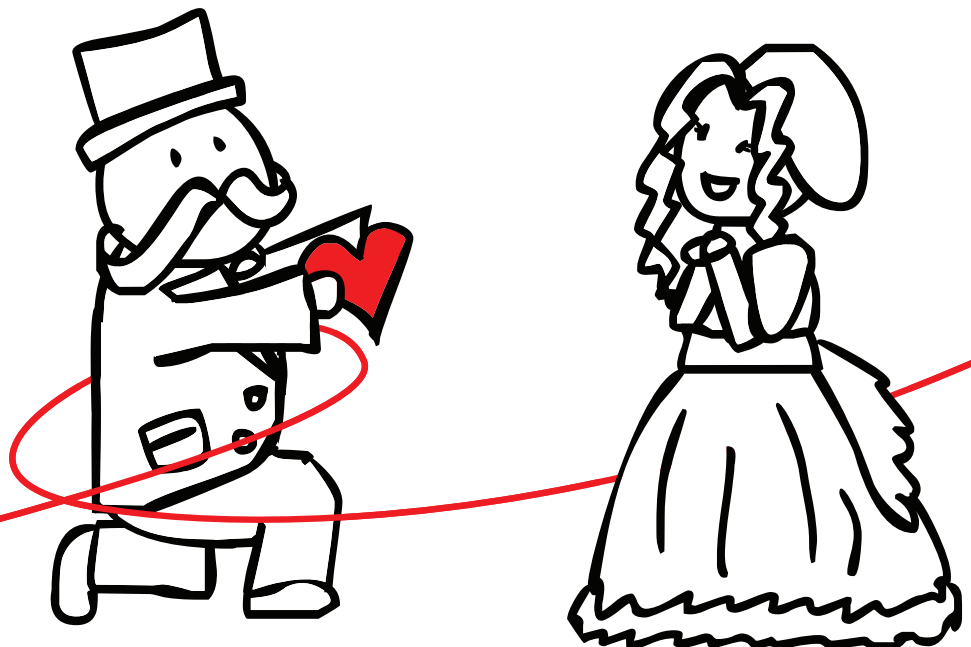

## Free live online courses

Treat yourself. This month, join a free 35- to 75-minute training session facilitated through cutting edge remote classroom technology. Learn the basics and get answers to your questions in a convenient, highly interactive environment.

## Buy one registration and get another free on distance education courses

Make a date with a special teacher in your life. For the entire month of February, when you register for a *SMART Notebook™ Level 1* or a *SMART Lesson Development Workshop* distance education course, you'll receive a second registration for the same course for free.

These one-week distance education courses cover the same content as our full-day, face-to-face offerings. They're designed to help you use SMART products more effectively in your classroom or workplace. Interactive online sessions feature hands-on activities, videos and other free resources that provide opportunities for you to practice what you've learned before moving on to the next session.

# Be SMART training and professional development's Valentine

To register for a course, click the **Register Now** link in the course description below, or register through the SMART Learning Space at [learningspace.smarttech.com](http://learningspace.smarttech.com).

To register the second participant for a distance education course:

1. Register yourself for the course of your choice
2. Visit [smarttech.com/contacttraining](http://smarttech.com/contacttraining) and fill out the required text boxes
3. In the Question/Problem description text box, type *February Promotion* and list the course name, the course date and the name of the second participant
4. Click the **Submit** button on the bottom left corner of the page

You'll receive an e-mail confirming the registration of the second participant.

## Live online courses

### **Introduction to SMART Notebook Software and the SMART Board Interactive Whiteboard**

This course is designed to help new SMART Board interactive whiteboard and SMART Notebook collaborative learning software users to understand the role of these solutions in the interactive classroom. You'll receive an overview of the software and hardware, and learn the basic features and functions of both SMART Notebook software and the SMART Board interactive whiteboard.

[Register Now](#)

### **SMART Notebook Training (Intermediate)**

Extend your skills by learning to add and manage SMART Notebook Gallery content. Learn to animate objects and to link objects to web pages, files, sounds and attachments. You'll also learn how to simplify lesson delivery with page themes and grouping.

[Register Now](#)

### **SMART Notebook Math Tools**

A 30-minute look at the basic functions of SMART Notebook Math Tools software, including measuring tools, Math Ink and graphing.

[Register Now](#)

### **Introduction to the SMART Table**

Learn the basic functions and features of the SMART Table interactive learning center, including customizing activities and accessing ready-made activities.

[Register Now](#)

### **Introduction to SMART Response**

Learn the basics of the SMART Response interactive response system, including installing hardware, creating class lists, creating, importing and administering quizzes, and using Teacher Tools software.

[Register Now](#)

### **Introduction to SMART Sync**

This course is aimed primarily at K–12 instructors, and provides training on the basics of SMART Sync classroom management software.

## Become SMART certified

This February, make your love of learning a lifelong commitment. With our discounted distance education courses, you're well on your way to becoming a SMART Certified Lesson Developer.

The SMART Certified Lesson Developer program teaches you how to use SMART Notebook software and other SMART products to create lessons that improve learning results. SMART Certified Lesson Developers:

- Use technology as a means to support pedagogy and the curriculum
- Design lessons for responsive, student-centered delivery
- Employ effective message design techniques

Click the link to [learn more](#) about the SMART Certified Lesson Developer program.
