SMART

An all-in-one technology exclusive to SMART Boards

The SMART Board's built-in iQ technology puts everything you need in one place, available at the touch of a finger. There's no need for wires and cables. The embedded computer offers one-touch access to the robust suite SMART Learning Suite applications for interactive lessons, game-based activities and online co-creation. There's also access to collaboration tools, like the built-in web browser and wireless screen sharing.

iQ APPLIANCE NOW INCLUDED —
SPNL-6265-V2 and **SPNL-6275** models only.

Features

Powered by SMART Learning Suite

SMART Learning Suite includes SMART Notebook®, SMART lab™, SMART response® 2 and SMART amp™. Together, they connect students, teachers and devices to turn lessons into enriching learning experiences.

Silktouch™ technology

The most accurate, natural, and responsive touch experience from corner-to-corner. Fingers glide effortlessly over the surface, providing hours of error-free use in perfect comfort.

SMART ink™ technology

Writing is natural and looks better with SMART ink. Whether you're using a pen or finger, each stroke is a work of art. Its realistic digital ink improves legibility, so teachers don't have to re-write and students feel confident contributing.

Pen ID™

Students can see their contributions free from interruption by their partner. Using different colored ink, you can write independently and simultaneously in any lesson activity to open new collaborative opportunities.

Object awareness™

You already know how to use it. Offering the most intuitive experience by automatically differentiating between a finger, pen or palm, do what comes naturally. Touch, write, erase. Simplicity at its finest.

4K Ultra HD resolution

Durable commercial-grade, glare-free LED panels display brilliantly detailed 4K Ultra HD images, text and video (3840 x 2160 pixels). Crisp content clarity and readability keeps students involved no matter where they're seated in the room.

Simultaneous touch points

With 8 simultaneous touch points, on Windows or Mac, multiple students can use gestures, like zoom, rotate and flip, at the same time. The natural learning experience develops essential life-long collaboration skills without students realizing it.

Mini PC compatibility

Have the flexibility to equip classrooms and collaboration environments the best way you see fit. There are mounting points for Mini PCs available.

ENERGY STAR® compliant

Certified by ENERGY STAR to save energy, lowering your total cost of ownership.
