

# SMART OPS PC modules **PCM13 series**

## Overview

SMART Open Pluggable Specification (OPS) PC modules provide a hassle-free Windows® 11 Pro installation based on 13th generation Intel® Core® processors and are designed specifically to work with SMART Board® interactive displays. Available in three standard configurations, all OPS PC modules in the PCM13 series are WHQL (Windows Hardware Quality Labs) certified and fully licensed with Windows 11 Pro out of the box. Install the OPS PC module in a SMART Board interactive display's OPS slot to provide a complete 4K UHD Windows 11 installation at your fingertips, without the need for an external device or additional cables.

Install familiar Windows software applications, such as SMART Notebook® collaborative learning software, SMART TeamWorks™ visual collaboration software, and SMART Meeting Pro® software, and access the internet directly through your existing interactive display's network connection. Upgrades and service for the OPS PC module are easy to perform without removing the interactive display from its mounting.

### Note

OPS PC modules are available with customizable memory (RAM) and storage (SSD) on extended lead times with minimum order quantity. Please contact your local sales representative for details.
