

Getting Started with GX

Lessons Learned

Use the checklist to apply what you have learned!
Try each activity and check it off as you go!

Connecting Your Computer

- Connect your computer to the display with HDMI and USB cords
- Toggle between your computer and the display

Using SMART Ink

- Move the floating SMART Ink icon on your display
- Customize your pen settings, colors, and line thickness
- Write on the board and use your palm to erase

Exploring Built-in Android Features

- Open the Apps Locker on the Home Screen and locate eShare
- Use eShare to share from your device or a student device
- Open the interactive whiteboard from the Home Screen
- Change the background of your Whiteboard and write a student question
- Open the save options on the interactive display and save
- Open the floating toolbar on the right side of the screen and try two tools

Object Awareness - Interacting with the Display

- Change the pen color on the Whiteboard, draw a picture, and erase
- Toggle between multi-touch mode and split screen modes

Using the Whiteboard Features + Widgets

- Import a picture to the Whiteboard
- Use the selector tool to move content
- Add a Whiteboard page and navigate between pages

Exploring the Browser

- Open and interact with a web page you use in class
- Open the floating toolbar and try two widgets
