SMART®

Professional Development

Maximize the impact of your SMART investment

Specifically designed to meet the needs of your teams, either in-person, remote, or a hybrid model, SMART's Professional Development is designed to help you integrate the technology you need to streamline decision-making, enhance critical-thinking skills, and create collaborative experiences.

Your Professional Development session features:

- Up to 30 participants
- Choose in-person instruction at your location or an interactive online session
- Content tailored to meet your organization's technology and goals

- Integration of your existing resources and use cases with your SMART solution
- Training resource package to share or reference later
