Solutions for manufacturing

Tackle problems and maximize productivity with SMART

Meet, share, and problem-solve – together.

Instant knowledge sharing, collaborative problem-solving and swift decision-making happen in real-time with SMART Board® interactive displays. Only SMART allows participants to pick up a pen and write directly into and save annotations in original file formats to reference later, effortlessly turning ideas into actions.

Bring problem solving and KPI dashboards to life.

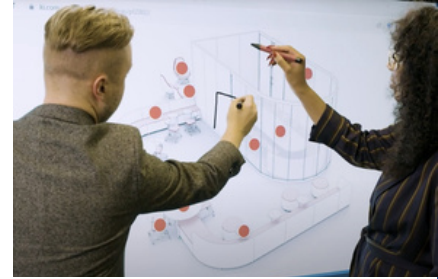

When teams on your production floor can instantly get hands-on and leave their mark within files to tackle daily operational problems together, productivity and quality assurance soar.

Review and markup live digital dashboards with SMART Ink to capture and save insights digitally – and clear all those extra dry-erase boards off the production floor.

Streamline Digital Lean

SMART solutions are robust enough for your production floor and work seamlessly with your existing operational excellence tools and technology so you can get the most out of your technology investments.

A lifetime of optimal usage. SMART makes it easy to maintain and support your investment over the years with automatic OTA updates, market-leading upgrade options, and SMART Assure warranty for 24/7 tech support and seamless coverage.

Works seamlessly with Microsoft 365 Office apps and common file formats, including PowerPoint and PDFs

Give your teams a platform to share, problem solve, and achieve operational excellence.

Products to solve problems, faster

SMART Board Pro series interactive displays

No training needed to use our ultra-powerful digital displays. Just pick up a pen and engage with any file type, no matter where you are. Crisp, 4k Ultra HD resolution with sizes ranging from 55" - 86".

SMART Meeting Pro

The unbound digital workspace included with your display. Use integrated OpEx tools like Ishikawa and 5S templates or create your own for more efficient problem-solving and overall cost reduction.

SMART Height-Adjustable Mobile Stands

The ultimate flexibility to engage entire teams to contribute in any manufacturing environment.
