SMART®
Solutions for the modern workplace

Where people and ideas meet

The modern workplace redefined

How to make a more human, connected workspace

Exciting opportunities for collaboration have opened up a whole new world of workspace configurations. Today's employers know that they need to provide opportunities for dynamic collaboration, whether their team is in-person, remote, or a combination of the two.

This guide will showcase how to create these necessary dynamic spaces through interactive technology. Investing in professional collaboration tools can result in teams from any industry being able to solve problems faster and present ideas in an engaging way.

Quality improvements

made as a result of workplace collaboration are **valued** at **$2,517 (£1,982)** per employee each year.[1]

Open collaborative spaces

Unlike isolating cubicle culture, collaborative open spaces provide freedom for impromptu collaboration sessions, brainstorming, and one-on-one meetings.

Organic connection promotes innovative, out-of-the-box thinking that prompts solutions to real problems. It also creates connections among workplace peers that increase levels of work satisfaction.

The best collaborative spaces will be open, and have varied seating options and ample natural light. Design-wise, these rooms should be a blend between a high-energy coffee shop and a conference room.

SMART interactive displays are the only displays on the market that allow multiple users to brainstorm, ink, and interact with content at the same time without interfering with one another – functionality that is central to the success of a collaborative space.

People who collaborate on the job and who have access to digital collaboration tools are up to **17% more satisfied** with their job and workplace culture.[1]

Conference room

Conference rooms hold meetings of critical importance where leaders need to feel confident in front of their peers and clients. These rooms typically accommodate large groups and are often equipped with room control systems and schedulers.

The best conference rooms minimise disruptions and ensure privacy for both in-person and remote participants.

SMART interactive displays are meeting ready, with team members able to quickly and easily use all the most popular video conferencing platforms including Microsoft Teams™, Zoom™, and more. Users can transform their static presentations into memorable interactive experiences for everyone involved.

An estimated **$37 billion** is lost per year to unproductive meetings.[2]

Huddle space

Great for small group meetings, huddle spaces allow for more privacy than the open collaborative space, without being as formal as the conference room.

Effective huddle spaces should be areas where both collaborative brainstorming and video meetings can take place. Team members should be able to easily share content from their personal devices and annotate digital documents as needed.

SMART is the only provider that enables a true 'pick up a pen and write' experience where users can open a Microsoft or PDF file and directly ink into the document without using awkward annotations or clunky overlays.

According to a Stanford University study, the mere feeling of working together allowed participants to stick to their tasks **64% longer** than solitary workers.[1]

Training space

Training spaces are exactly what their name suggests: they're places where onboarding, professional development, and key training take place.

It is absolutely essential to ensure that participants are in a comfortable, spacious room, and that the training they receive is memorable. A training space therefore shouldn't just be equipped with a static display which team members sit in front of.

With SMART interactive displays, instructors can breathe life into their presentations and get participants out of their chairs and directly interacting with the lesson content. Interactive displays also enable instructors to reshape, resize, and recontextualise diagrams in real time in a way that TVs can't do. If instructors want to face their audience as well as interact with their content, then SMART Podium (as depicted above) is perfect just for that.

40% of existing workers will require up to six months' worth of reskilling.[3]

Set up with no fuss
Supports HDMI, dual USB-C, USB-B, USB-A, and VGA ports. No additional adaptors required.

SMART Board® NX series

The SMART Board® NX series is a commercial display that enables your organisation to provide digital signage, share content, and optimise dual-screen setups for video conferencing including Microsoft Teams.

65" | 75" | 86"

Quality you can rely on
The NX series goes through rigorous accelerated life testing to meet SMART's high durability and reliability standards.

Optional OPS computing
Bring a Windows experience to the display without having to worry about untidy cables or a clunky setup.*

Standardise simply
SMART Remote Management makes it easy for your team to remotely manage your entire SMART ecosystem.*

Share from any device
Share content with a single cable, or wirelessly over your Wi-Fi network, through a browser, or over an app.

Designed for Microsoft Teams
Combine the NX series with any SMART interactive display to create the ultimate dual-screen setup for Microsoft Teams meetings.

Invest in our Earth
Energy Star certified and Ecodesign compliant to lower your organisation's carbon footprint.

Crisp visuals and audio
Enjoy 4K UHD of clarity and brightness, and 40 W of sound.

Simple setup
The NX series comes with a remote control (with air mouse capabilities), a variety of ports, and a USB-C connection cable for any setup.

*Optional, not included with purchase

SMART | **smarttech.com**

SMART Podium interactive pen display

Empower business professionals, trainers, emergency workers, and military personnel to communicate more easily and effectively, in the workplace, in the field, or from home. The **SMART Podium** with a battery-free pen works with Windows or Mac OS computers to provide touch, gestures and digital ink while video conferencing, or while projecting an image to a projector or display.

Next generation available 2025

Plug and play
Enjoy SMART's best-in-class interaction on connected computers, including 10 points of precise interaction and fluid integration with native inking tools like Windows Ink.

SMART Ink
SMART ink desktop annotation software enables participants to directly annotate into PDF and Microsoft Office without clunky overlays or app switching

Project at any size
Project analogue or digital video to any size projector or display with HDCP-compliant video out for crisp and clear content in rooms of any size.

Palm rejection
Write, gesture, and navigate comfortably while resting your palm on the display.

Adjustable stand included
Use the podium for hours at any angle without finger burns on an anti-glare, ultra-smooth surface and a stand that's adjustable between 11° and 73°.

Cordless battery-free pen
Navigate and mark up content effortlessly using a battery-free cordless pen with pressure inking, a built-in eraser and customisable buttons.

SMART stands

SMART electric height-adjustable stands with integrated power bar* turn any space into a collaborative space with only one cord to plug into the wall. SMART's wall stand eliminates the need for expensive wall reinforcement, and provides height adjustment for up to 86" interactive displays, flexibly enabling hands-on collaboration and presentations to large audiences.

Flexibility and mobility
Convert any space into a learning or a collaboration space by adding flexibility and mobility to your installations with SMART's mobile stands.

Height-adjustable
Industry-leading height adjustment SMART mobile stands support a variety of collaboration environments.

Fully UL listed
Suitable for all SMART interactive display sizes, SMART stands are fully UL listed for robust standards for safety and stability you can rely on.

Optional add-ons
Add-on laptop shelf, handles and cord hook options are available.

5-year warranty
SMART mobile stands come with an industry-leading, best-in-class 5-year warranty to give you the peace of mind you deserve.

SMART PCM13 OPS PC

Put the power of Windows in your display.

The SMART PCM13 Open Pluggable Specification (OPS) PC module, designed and tested specifically for SMART Board® interactive displays, provides a hassle-free Windows® 11 experience based on leading Intel® Core® processors.

The **SMART OPS PC module** brings all the functionality that you'd expect from a Windows system (such as remote management and Microsoft Office) combined with SMART Ink – the best interactive writing experience on the market.

Why use a SMART OPS PC module?

Longevity
The display stays as up to date as a Windows PC, extending the lifespan of your purchase for years to come.

Partnered with the best
The SMART OPS PC module is built with a generation 13 Intel® Core® processor and enables the latest Windows environment.

Stay tidy
OPS PC modules slot in neatly behind the display with no cabling required, and reduce the number of failure points.

SMART Meeting Pro

SMART Meeting Pro visual collaboration software allows colleagues to create and capture ideas in the virtually unlimited interactive workspace. The whiteboard expands as users add images, files, links, and notes – even over multiple displays and meetings – enhancing collaboration.

Leverage dynamic content
No space restrictions – pan in any direction and zoom in and out in an unlimited whiteboard space.

Advanced writing
Easily convert handwritten notes to text with a touch using the default calligraphic pen that automatically styles writing into regular, sleek lines.

Access the workspace
Enable colleagues to prepare, review and work on files and collaborate with co-workers before, during, and after a meeting from anywhere with a Personal licence.

Leverage multiple displays
Connect up to 8 displays to the same workspace and control what content appears on which screen with a Room licence. Notes on one display show up on all the others.

Integrated screen capture
Quickly import content from any application into the workspace using the screen capture tool from the SMART Meeting Pro menu.

Customised templates
Build out customised galleries using your company's templates. Organise your galleries using folder names and export them for use throughout your organisation.

SMART TeamWorks

Experience an end-to-end meeting solution that is designed for fast, flexible, and limitless connectivity, collaboration, and engagement. Share screens, access personal cloud storage and calendars, open a collaborative whiteboard, and launch meetings faster with one touch, all from the home screen with SMART TeamWorks.

Launch meetings faster
Launch meetings with one touch from the home screen on most popular conferencing platforms such as Microsoft Teams, Zoom, Google Meet, Webex, and more.

Collaborate and share
Wirelessly screencast up to 8 devices with native Airplay, Google Cast, and Miracast. Share content remotely and increase collaboration with markup capabilities on shared screens.

Leverage dynamic content
Add and interact with dynamic content in a collaborative whiteboard. Draw and work with multiple objects including images, PDFs, Microsoft Office files, sticky notes and more.

Windows 11 compatible
Enjoy videoconferencing platform versatility and extensive whiteboard collaboration on a powerful Windows 11 computer with a connected SMART OPS PC.

Bring your device
Access your OneDrive, Google Drive, and Dropbox files and personal calendar directly from TeamWorks by simply scanning a QR code.

Save and share your work
After a meeting, save your workspace to your TeamWorks app or save and share a PDF recap with meeting participants.

SMART Remote Management

SMART Remote Management is a cloud-based device management tool that provides a one-stop solution for technology administrators to maintain, control, support, and secure devices from any web browser. SMART Remote Management is designed to centrally manage all SMART Board displays with iQ.

Control any device from anywhere
Control and manage iQ-powered SMART interactive displays and iOS, Android, Chrome OS™, and Windows devices from one central location.

Security at your fingertips
Get complete peace of mind with features such as tracking and locking devices, blocklisting or allowlisting website URLs or apps, pushing security settings certificates, setting triggers and alerts, and even sounding an alarm.

Manage device fleet configuration
Manage any size of device fleet, from hundreds of devices to hundreds of thousands. Control your displays at a group level, so you don't have to manage them one by one.

Save deployment and management time
Provide support, push applications and files, and change system settings on one or all devices through a single intuitive dashboard from your fingertips.

Real-time reporting with an intuitive dashboard
Get a real-time summary view of not only your iQ-powered SMART displays, but your entire mix of licensed devices – no matter their location.

Install apps remotely
Easily install and manage apps remotely on a single device or multiple devices. You can also set up a workflow to perform multiple actions at once.

Compatible with SMART solutions

SMART interactive displays and collaboration software are designed to offer the best-in-class interactivity and value to organisations globally. Endless compatibility and increased flexibility of choice with industry-leading technology partners, SMART solutions connect well with your organisation's existing ecosystem.

SMART interactive displays not only work well with popular video-conferencing platforms such as Microsoft Teams, Zoom, Google Meet and Cisco Webex, but also integrate with some of the big names in audiovisual technology such as Microsoft Teams Room-certified Logitech cameras, Windows, Poly, Miro, Barco, and more.

SMART interactive displays with iQ
Engineered for true longevity

Designed for the future, with industry-leading upgradability options and product lifespan, SMART displays guarantee a strong ROI on any size investment.

Touch engineered for excellence
With 35+ years of in-house development experience and 400 tech patents and growing, SMART interactive displays take the industry's next generation touch technology to places no other manufacturer does.

Designed to last
SMART interactive displays survive intensive accelerated life testing, including extreme temperature, humidity and voltage testing, ensuring less downtime and longer lifespan.

Cutting edge chip and port selection
SMART's long-term industry experience with SOC (system on a chip) manufacturers gives us access to cutting-edge chip and port selection, anticipating technology trends to provide future-proof technology.

Hassle-free OTA updates to SMART-developed Android platform
Automatically benefit from patches and updates to Android, plus SMART apps and features, so your technology stays secure, lasts longer, and keeps up with the market.

SMART | smarttech.com

Sustainability is at the core of our innovation

It's no secret. From the earth to your boardroom, the journey of an interactive display has an impact on the environment. We consider this impact and that is why at SMART, a fair, humane, and sustainable way of doing business is not just a goal but a requirement.

Up to 52% more energy efficient compared to other interactive display brands*

Small footprint. Giant strides.
We are constantly identifying ways to reduce our own carbon footprint and support you on your journey to net zero. Our packaging is recyclable and our latest optimised packaging initiative has reduced packaging design and materials, allowing us to fit up to 30% more products into shipping containers.

Efficiency energised.
Being ENERGY STAR® certified and EcoDesign compliant, our interactive displays are designed to help you lower power consumption and carbon footprint. Built-in sensors allow our displays to sleep and wake up automatically for a more energy-efficient performance.

Sourced ethically and responsibly.
We are committed to sourcing components and materials from companies that share our values on human rights, ethics, and environmental responsibility. We diligently evaluate and audit our direct suppliers on their commitment to becoming conflict-free.

Training and support services

Get the best out of your SMART business solutions

SMART provides training, installation, and support options to fit your needs and budget. Leverage a variety of resources for successful implementation.

Training

SMART's professional training offerings are designed to seamlessly integrate SMART solutions into your workflows. Available in-person or hybrid, these courses empower you to lead teams through effective collaboration, training sessions, and more.

Additionally, SMART offers a range of self-serve resources to help you get started.

Support

SMART's global support team delivers experienced, knowledgeable, and reliable assistance. With diverse warranty options and technical support, integrating your SMART solution is simple and hassle-free.
