SMART®
solutions for
High-Security Organizations

Ultimate security meets unmatched interactivity

Meet the dynamic needs of your environment while providing ultimate security and privacy. SMART solutions offer the best of both worlds: interactivity that breeds productivity and security options that give you peace of mind.

Real-time communication and collaboration that's safe and secure.

SMART solutions provide trusted, ultra-secure technologies that get everyone on the same page fast. Trusted by organizations at every level of federal and national governments and in the world's largest banking institutions, you can feel confident in the safety and powerful security behind SMART products.

ULTIMATE SECURITY AND PRIVACY

SMART solutions offer high-security organizations options when it comes to the security of their displays. Our displays are physically configured at the factory to protect from external attacks and we offer the option to purchase displays without Wifi or Bluetooth capabilities to meet the needs or constraints of your environment.

POWERFUL, REAL-TIME COLLABORATION

We provide high security without sacrificing collaborative capabilities. Facilitate dynamic teamwork in remote or hybrid environments, share and ink various file types, and communicate quickly and safely.

TRUSTED WORLDWIDE

Our displays are trusted and used by governments, militaries, banking institutions, and first responders worldwide to provide a powerful platform for problem-solving and training.

TAA COMPLIANT

✎ SMART Ink®

MARK UP ANYTHING, ANYWHERE.

SMART Ink lets teams markup anything, anywhere, without an overlay layer, which means you can continue to navigate and interact with content while writing, without interruption. Plus, convert digital writing to text to insert into files or text fields. SMART Ink works with PDFs and Microsoft Office files, and works fluently with Windows Ink.

SMART Ink is included with all SMART Board® Pro series displays.

# Why choose SMART solutions for high security?

Trusted by government, defense, militaries and first responders worldwide

SMART 6000S Pro interactive displays are used on all classification of networks within the US government, and our software complies with any security or virus protection standards. Not limited to the US, SMART products are trusted by military and first responders worldwide.

Exceptional security without compromising interactivity

SMART 6000S Pro series interactive displays offer TAA compliant models trusted by governments worldwide. Their built-in security features enable fully interactive and collaborative workflows while protecting user data. Physically configured at the factory to protect from external network attacks, SMART interactive displays provide exceptional security without compromising on interactivity for greater peace of mind.

Solve problems faster

For teams looking to find answers to complex problems in real-time and train employees for mission-critical decisions, SMART solutions help create realistic scenarios by connecting content, applications, and devices. Share screen content with inking and tools, annotation, and text input so teams are prepared for anything and clear on what's expected of them.

Use digital ink anywhere

When teams need to collaborate visually, SMART interactive displays and annotation software allow interaction with all types of content—images, PDFs, Microsoft Office® files, websites and videos. Users can bring maps, satellite imagery, video footage, emails and documentation to life and get vital information where it needs to go, fast.

Experience intuitive interactivity and uninterrupted collaboration

For teams collaborating and brainstorming in person, SMART is the only interactive display brand that allows multiple users to freely write, erase, and gesture at the same time—over any application.

Make instructions clear to understand

When there's no room for miscommunication, SMART Pro series interactive displays make it easy to connect and display content from **any device** with HDMI cables, USB-C cables or screen sharing options.

Bigger, better videoconferencing

For government organizations or secure facilities looking to collaborate remotely or in hybrid environments, SMART interactive displays work with an array of popular video conferencing apps, including Microsoft Teams™, Zoom, Google Meet™, Webex and more. Connect with remote participants by simply plugging in a Windows or Android UVC-compatible webcam, even one with a built-in microphone.

A hub for all your existing technology

Easily integrate with existing devices and peripherals. SMART displays include USB-C ports which allow users to connect any device for video, audio and touch with only one cable. This saves time and support costs as users can access in-room peripherals attached to the display without hunting for cables or plugging and unplugging devices.

Centrally manage all devices with SMART Remote Management

Maintain, control and secure devices from any web browser. Administrators can centrally manage iOS, Android, Chrome OS, Windows devices, along with their SMART Pro series interactive displays with iQ. Save the time and hassle of managing individual displays one by one.

More SMART solutions

SMART OPS PC

The power of Windows® 11 Pro in your display

Access Microsoft Office files and all your applications on a full Windows 11 Pro computer right at the display for true walk up and use simplicity. The OPS PC allows for a simple, standardized deployment in organizations, and provides ease of mobility and flexible use for your display.

SMART PENS & TOOLS

4-Pen Pack with Magnetic Pen Well

• Blue, green, purple and orange

• Magnetically mount pen wells at any height, on both sides of the 6000S series

Highlighter

• Dual color, yellow and green

SMART Electric Height-Adjustable Stands

Create easy-to-install collaborative spaces, anywhere

SMART's mobile stand with integrated power bar* turns any space into a collaborative space with only one cord to plug into the wall. SMART's wall stand helps save in expensive wall reinforcement, and provides height adjustment for up to 86" interactive displays, flexibly enabling hands-on collaboration and presentations to large audiences.

Fully UL certified and ADA compliant.

Model availability may vary by region.

TRAINING AND SUPPORT SERVICES

Partnering with SMART means we don't leave you to figure out how to use your collaboration solution—we help you achieve your goals. SMART provides training and has several installation and support services options to fit your needs and budget.

Training

Access our online training courses and self-serve, how-to videos on our hardware and software solutions anytime, anywhere, so you can get the most out of your collaboration technology—from day 1 onward.

Support

SMART global support has the experience, knowledge and resources to ensure consistent, fast and effective support. Make your SMART experience simply seamless with a host of warranty options, training resources and technical support.

Discover SMART solutions designed to meet the needs of high security work spaces.
