Solutions for Defense

Maximize every mission with SMART

Strengthen training

Improve personnel training with SMART Board® interactive displays by simulating realistic scenarios and increasing participant engagement. Only SMART allows participants to pick up a pen and write directly into and save annotations in original file formats to reference later, capturing everyone's attention and helping trainees retain critical information.

Solidify defense readiness

Ensure mission planning, command & control, and information dissemination can be adaptable in real-time with easy-to-use tools like our industry-leading SMART Ink®. Get everyone involved in the process without any complicated menus, overlays, or unnecessary steps to instantly markup mission briefings and operational planning for hands-on, collaborative information sharing.

Streamline integration and compatibility

SMART solutions fit securely into existing technology setups, offering privacy and security options for collaboration and conferencing.

Unleash full hybrid collaboration by connecting through Microsoft Teams, bring intuitive collaboration and interactivity to Crestron meeting rooms with Crestron Connected Crestron XiO Cloud, and capture, analyze, and save vital information using SMART Ink with common file formats, including PDF, PowerPoint and Excel.

SMART can be purchased on the following contracts:

- COTS
- FIRST Source
- NASA SEWP V
- BIE Acquisitions Contract
- GSA
- 2GIT
- ITES-3S

SMART partners with 'set-aside' AV integrators to allow federal contracting officers to fulfill small business and diversity contracting requirements.

Secure solutions trusted by military, government, and first responders everywhere.

High security collaboration starts with SMART

SMART Board 6000S Pro TAA Compliant

The ideal solution for high-security collaboration among teams - configured especially for governments, defense, and the highest security facilities with restrictions on Bluetooth, wireless, and USB peripherals.

SMART Meeting Pro

SMART Meeting Pro visual collaboration software allows government teams, first responders, and highly crucial and secure facilities to create and capture ideas in a virtually unlimited whiteboard canvas — and works without being connected to a network.
