# Electric height-adjustable stands

Add flexibility to any SMART Board® display with industry-leading height adjustment to support a variety of learning and collaboration environments.

## Mobile | Wall

### Mobile stand

Create interactive spaces anywhere – from large halls to small-group areas.

### Wall stand

Avoid expensive wall reinforcement by transferring the weight of the display to the floor.

**Fits all SMART Board series and sizes up to 86"**

**ADA compliant 5-year warranty**

# Choose the installation solution that works for you

No matter where you're looking to add interactive learning or collaboration – gymnasiums, auditoriums, meeting rooms, classrooms, libraries, huddle rooms, or maker spaces – SMART has you covered.

**Electric height adjustment** adds flexibility and convenience to your installation.

**Industry-leading height range** means anyone can create content anywhere on the display. (Wall stand only)

**Bounce-back mechanism** prevents damage to display and furniture when raising and lowering.

**Dual-column design** provides extra stability when interacting with or moving the display.

**Integrated, surge-protected power bar** saves on installation costs and protects your technology.

**Rear cabinet** stores cables and accessories with a surge-protected power bar for only one cord to plug into the wall.

**Multiple VESA mounting points** support mini-PCs and other peripherals.

**ADA compliant**, H-style mobile base provides access to all users, including those in wheelchairs.

**Fully UL listed and CE certified.** The only stands on the market with UL 962 Usage Area II certification, allowing stands to be safely used and left unattended in areas where children or individuals with cognitive disabilities are anticipated to be present.
