SMART®

SMART Board® 6000S Pro series

Collaboration made easy

65" | 75" | 86"

Get connected
Easily connect and interact with your devices and content so they do more to support collaboration – both in and out of the workspace.

Get simple
Offering powerful capability without complexity, the SMART 6000S Pro is as easy to maintain and future-proof as it is to use.

Get engaging
Perfect for the dynamic needs of today's businesses, SMART 6000S Pro gets everyone on the same page by allowing users to brainstorm and contribute ideas in real time, collaborate, ink over content, screen-share, and more.

Get connected

Seamlessly connect your office technology and infrastructure with a SMART Board interactive display. Bring together your standalone devices, computers and peripherals, digital tools, and content, so they're used to their fullest potential.

Connect devices for active collaboration

Share screens and send ideas to the display with native, browser-based, and app-based screen sharing. The **SMART Mirror app** for Windows and Mac OS enables screen sharing without prior network configuration and includes touchback support. Plus, **share live whiteboard sessions** with two-way annotation to standalone devices. Works both in and out of the workspace through any Internet browser, no login required.

Bigger, better video conferencing

The SMART 6000S Pro series works with UVC webcams, Zoom, Microsoft Teams™ and Google Meet™. An integrated microphone array offers presenters the freedom to move around the room while maintaining consistently outstanding audio. Enhance shared screen content in these applications with spotlights and digital ink that help communicate ideas and focus participants' attention.
Interact with every input

Plug in multiple computers and video inputs and switch between them easily and intelligently with live input preview. Plus, easily connect any device to the 65-watt USB-C ports for video, audio, touch, data, and charging with only one cable.
Get simple

SMART's exclusive walk-up-and-use touch and ink experiences make them the easiest interactive display for first-time and occasional users. Their low learning curve and intuitive features allow everyone to connect and interact with no training needed. With unmatched quality and exceptional privacy and security, SMART interactive displays are the ideal choice for any business environment.

Better touch and ink experiences

With 40 unique points of touch on Windows® computers and 20 on Mac® computers and iQ, Simultaneous Tool Differentiation lets multiple users write, erase, touch, and gesture at the same time, without toolbars or menu selection.

Object Awareness detects touch, pens and palms automatically. **SMART Ink** desktop software lets users write into and over web browsers, applications and files, including PDFs and Microsoft Office® files.
Easier to maintain

We put in the effort, so you don't have to. The SMART 6000S Pro display works out of the box, is updated automatically over the air, and can be easily managed at scale with SMART Remote Management software*.

Backed by SMART Assure warranty (region dependent), which includes expert technical support, advanced hardware replacement with two-way shipping, and on-site RMA support.

*Subscription for length of included product warranty term

Enhanced personalisation and automatic power-up

Sign in to the display with a Google or Microsoft account or simply tap the included NFC-enabled SMART Board ID card for secure access to files and cloud storage, and easy access to apps, favourites, bookmarks and custom widgets. Cloud storage travels with the user when they sign into any SMART display with iQ, anywhere. The display also wakes up as soon as a user picks up a pen, so there are no barriers to getting started.
Get engaging

Keep participants engaged, remotely, in-person or in a flexible work environment to improve information retention, meeting outcomes and employee productivity with the SMART 6000S Pro interactive display.

Work in an unbound workspace

Don't bother erasing. Just keep working. SMART Meeting Pro lets teams capture ideas in the virtually unlimited interactive workspace that expands as colleagues add images, files, links, and notes – even over multiple displays and meetings – for enhanced collaboration.

Ink anywhere

SMART Ink desktop software lets you write into and over web browsers and applications, including PDFs and Microsoft Office files, then save notes in almost any file type.

Exceptional embedded experience – powered by iQ

SMART 6000S Pro with iQ puts everything you need in one place. The embedded computer offers one-click access to SMART software applications and collaboration tools, including a whiteboard, web browser, and wireless screen sharing. Share screens natively from any Android™ (Google Cast) and iOS® (AirPlay) device, through a browser or an app with touch-back support for Windows and Mac without prior network configuration with SMART Mirror.

iQ is an integrated Android-based experience; a platform purpose-designed to be easy for users, regardless of their technology comfort level. iQ gives users an easier, more powerful, and more accessible way to engage and collaborate in a remote, in-person, or hybrid office environment.

Windows and Mac OS experience

Enjoy the full SMART Board experience on any connected Windows (40 points of touch) or Mac (20 points of touch) computer. Get precision interaction and natural intuitive touch and ink with SMART Ink, Object Awareness, and Simultaneous Tool Differentiation across web browsers and applications.

Optional SMART OPS PC Module

Add a SMART OPS PC Module for an all-in-one, cable-free Windows experience. The OPS PC allows for a simple, standardised deployment in organisations, and provides ease of mobility and flexible use for your display.

Built to last

The SMART Board 6000S Pro series meets world-leading standards for quality, safety, environmental, and regulatory compliance, using third-party verification, and is backed by technical support services and SMART Assure warranty coverage (region dependent). It also comes with a subscription to SMART Remote Management software.*
