SMART Notebook®

SMART Ink™

SMART Exchange

Powered by iQ

A powerful platform for engaging teaching. Easy workflows and a straightforward UI give teachers the confidence to easily add free content and interactive elements to their teaching, regardless of their tech comfort level.

Interactive teaching tools and resources bring instruction to life. Use graphic organizers, images, video and digital manipulatives to instantly create activities or enhance existing lessons.

Just 2 clicks to connect student devices for active learning.

Only SMART displays allow an entire class to work directly in the embedded whiteboard - without student logins - so teachers don't need to interrupt the lesson to get students signed into a separate tool.

Unique to SMART: toggle the shared whiteboard to student-based navigation at any time, promoting active learning by allowing students to review content at their own pace.

SMART Ink™ — for Windows and Mac

Markup anything, anywhere.

Overlay-free annotation for Mac & Windows keeps your annotations in place even when you move between applications. Navigate freely and revisit notes without constantly turning on and off an inking layer.

SMART Ink works fluidly with applications' native inking tools, including Windows ink, provides text recognition, and integrates with SMART Notebook.

SMART Notebook®

Free, award-winning SMART Notebook for Windows and Mac helps you create dynamic, interactive lessons and deliver them on your SMART Board interactive display.

Keep learning lively with features like infinite cloning, text editing and 3D objects, and subject-specific tools like creative pens, equation editor and math tools.

Plus, access thousands of games, activities, and lesson plans made by other teachers with **SMART Exchange®**
